

## Major Business Application Identification Report

System ID	Short Name	Long Name	System Description	Inventory Source	System Location	System Platform	System OS	Version
2526	1010EZ	1010EZ TRACKING FILE	This Forum system tracks and confirms the 10-10EZ applications submitted by veterans through the VA web software. If delivery to the veteran-specified facility is not successful within a specific timeframe, the Forum module sends a daily transmission management report for those not acknowledged by their target facilities.	2005 ESI Survey		Hewlett Packard Alpha	VMS	
1005	ACE	Automated Certificate Eligibility	A web application that allow lenders to generate on-line Certificate of Eligibility (COE) and retrieve limited loan information from the Automated Loan Processing System (ALPS).	2005 ESI Survey, FISMA, EA 2.1		Compaq Proliant DL580R2	Windows 2000	
2560	ACRS	Automated Customer Registration system	Used to register for access to Austin z900 computer resources. ACRS provides for employees' requests for access to computer systems, data files, and other software tools, using functional task codes.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	IBM Mainframe (S/370, S/390)	Z/OS (IBM Mainframe OS-390)	
2562	Active Advice	Active Advice	Active Advice Clinical Guideline Set, Solucient Length of Stay Benchmarks, Solucient ECD9/CPT Crosswalk, HSS DRG Grouper. Software used by the VISN 19 Centralized Network Authorization Office to manage Fee Basis authorizations & payments for VISN 19.	2005 ESI Survey	Fort Harrison, MT	x86-based Processors (Intel, AMD)	Windows 2003	3.6
2585	ADS	Automated Distribution System	Controls the distribution of VA recurring publications to all field facilities and to VA Central Office (VACO) components.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	IBM Mainframe (S/370, S/390)	Z/OS (IBM Mainframe OS-390)	
1007	ADVISOR	Advisor Computer Based Training	A desktop computer-based training application that facilitates the Veterans Service Representatives (VSRs) in learning the subject matter associated with their job through structured access.	2005 ESI Survey, FISMA, EA 2.1		x86-based Processors (Intel, AMD)		
2587	AERATES	Architect/Engineer Rating System	The Architect and Engineering Rating database (AERATES) stores ratings on architect and engineering contracting firms providing design and consulting services to the VA. AERATES gathers information according to requirements set forth in the Brooks Act. It also meets the requirements for the Federal Acquisition Review (FAR) and the Veterans Affairs Acquisition Review (VAAR)	2005 ESI Survey		Digital Equipment (VAX)	UNIX - Other	
1009	ALPS-LP	Automated Loan Production System - Loan Processing	ALPS-LP is a case management tracking system for VA Home Loan processing at VA Regional Loan Centers. ALPS is a client/server, GUI-based application updating VBA's Oracle Corporate database. Part of the Loan Guaranty (LGY) program, which assists veterans and active duty personnel in the purchase and retention of homes in recognition of their service to the Nation	2005 ESI Survey, FISMA, EA 2.1, 2006 OMB 300		E10K SUN	Solaris 9.0	
1025	AMAS	Automated Monument Application System	This Oracle database application supports monument ordering and tracking. Closely aligned to BOSS.	2005 ESI Survey, FISMA, IT Procurement Tracking System, EA 2.1, 2006 OMB 300		IBM RISC System	AIX (IBM UNIX)	

## Major Business Application Identification Report

System ID	Short Name	Long Name	System Description	Inventory Source	System Location	System Platform	System OS	Version
1010	AMIE II	Automated Medical Information Exchange	AMIE II is a desktop application that allows medical center staff read access to the BDN system for veterans' eligibility inquiries while regional office staff have electronic access to medical supporting data and streamlined logon capability within the VHA VISTA system.	2005 ESI Survey, FISMA, EA 2.1	Hines, IL - VBA Benefits Delivery Center??, Philadelphia, PA - VBA Service Delivery Center??			
1016	AMIS	Automated Management Information System	An Oracle database application used for data handoff.	2005 ESI Survey, FISMA, EA 2.1		IBM Mainframe (S/370, S/390)	UNIX - Other	
2610	AMIS 290	AMIS 290	VBA Intranet application that collects VHA medical facility timeliness information for VBA. According to a joint memorandum of understanding signed several years ago between VBA and VHA, the VA medical centers are to process VBA's disability examination requests within 35 days. Regional office personnel enter timeliness information by facility.	2005 ESI Survey		Compaq Proliant DL580R2	Windows 2000	
2636	ARC	Allocation Resource Center	Online system used to classify, by type of care, all veterans' inpatient and outpatient service for the fiscal year.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	IBM Mainframe (S/370, S/390)	Z/OS (IBM Mainframe OS-390)	
2641	ARPA	Automated Request for Personnel Action	electronic 52	2005 ESI Survey		Hewlett Packard RISC System	Windows 2003	
2647	ASI	Addiction Severity Index	The Addiction Severity Index (ASI) records and stores information about veterans with substance abuse problems. Substance abuse patients are administered a standard questionnaire of approximately 200 questions. Provides reports to PERC for evaluation of substance abuse patient care performance at each of the VAMCs.	2005 ESI Survey		x86-based Processors (Intel, AMD)	UNIX - Other	
2650	ASISTS	Automated Safety Incident Surveillance and Tracking System	The Automated Safety Incident Surveillance and Tracking System (ASISTS) is a repository of VHA employee accident data. While many types of accidents are captured, the primary focus of the ASISTS database is to track and to report on employee exposures to blood borne pathogens through needlesticks, sharps, and bodily fluids.	2005 ESI Survey		MAINFRAME	z900	
2655	ASR	Automated Sales Reporting for VCS	Reporting from Veteran Canteen Service back-office functions and registers.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	x86-based Processors (Intel, AMD), Sun RISC System	Solaris, Windows 2003	
1175	Audiocare	Mumps Audio Care	AudioRefill allows patients to order medication refills and to check on the status of a prescription. AudioReminder is an automated appointment reminder telephony system that calls patients to remind them of upcoming appointments. The system is installed at every Medical Center in VISN 9.	2005 ESI Survey, FISMA, IT Procurement Tracking System	OTHER Unspecified	x86-based Processors (Intel, AMD)	Windows 2000 Server	4.0
2689	Background Investigation Tracker	Background Investigation Tracker	Web and database application used by contracting, HR, and ISOs to track the progress of background investigations.	2005 ESI Survey	OTHER Unspecified	x86-based Processors (Intel, AMD)	Windows 2003	

## Major Business Application Identification Report

System ID	Short Name	Long Name	System Description	Inventory Source	System Location	System Platform	System OS	Version
1041	BDN - Common Services	BDN End-of-day, Security, and Common Commands processing	The Benefits Delivery Network (BDN) is the legacy system employed by VBA to process entitlements for three of the five business lines: Compensation and Pension, Education, and Vocational Rehabilitation and Employment. The primary services of the BDN entail the receipt, processing, tracking and disposition of veterans' applications for benefits and requests for assistance, and the general administration of legislated benefit programs.	2005 ESI Survey, FISMA, IT Procurement Tracking System, 2006 OMB 300	Hines, IL - VBA Benefits Delivery Center	Honeywell Bull Mainframe	GCOS	
2705	BDN Shell	BDN Shell (RO developed app)	BDNShell is a program which 'wraps around' a Softerm session. It provides users of BDN with a user friendly front end for access. It also provide the ability to capture screen prints of a session while it is happening.	2005 ESI Survey				
2706	BDN301	Benefit Delivery Network 301	The purpose of the BDN301 Interface is to provide an automated facility to bridge claimant rating data from the Sun Oracle database to the BDN RDP DMIV database (PIF) for use in the BDN payment system. The implementation of this interface will satisfy a primary MAP business objective, i.e., Single Data Entry	2005 ESI Survey		E10K SUN	Solaris 9.0	
2520	Bed Cntl DB	Bed Control Database	The Bed Control database records the levels of operating beds and of authorized beds at each VAMCs, and tracks requests for changes in these levels. For changes in operating bed levels, the Director of a Medical Center notifies the Director of the respective Veterans Integrated Support Network (VISN). The VISN bed control planner enters the change notice into the database and sends a confirmation to the medical center Director.	2005 ESI Survey		DEC ALPHA	VMS	
2707	Bed Control	VHA National Bed Control	The National Bed Control System is to automatically track and process bed change requests through different review and approval levels in VA Central Office, and enable accurate reporting of current authorized and operating beds and/or changes to bed numbers over time at all organizational levels.	2005 ESI Survey	OTHER Unspecified	x86-based Processors (Intel, AMD)	Windows 2003	
1022	BIRLS Batch	Beneficiary Identification and Records Locator System	A legacy IBM mainframe application that processes on-line inquiry and updates, controls number assignment and different folder-type management, stores inactive compensation, pension and education data, and active/inactive insurance policy numbers. The maintenance of BIRLS is tied to VADS since they both are involved in processing Veteran claims	2005 ESI Survey, FISMA, EA 2.1, 2006 OMB 300	Austin, TX - AAC Data Processing Center	IBM 2064-2c5	OS ZOS version 1.5	
2716	BITS	Business Improvement Tracking System	The system is used to track progress in the Management Analysis/Business Process Reengineering initiative (MA/BPR)	2005 ESI Survey	Silver Springs, MD - VHA IT Field Office	x86-based Processors (Intel, AMD)	Windows 2003	
2720	Blackberry System	Blackberry Enterprise Server	This system ties into Exchange but is used to support 2,500 users of the Blackberry devices. The Blackberry devices allow users to received, read and respond to e-mail via a handled device.	2005 ESI Survey	Hines, IL - VHA IT Field Office	x86-based Processors (Intel, AMD)	Windows 2003	

## Major Business Application Identification Report

System ID	Short Name	Long Name	System Description	Inventory Source	System Location	System Platform	System OS	Version
1024	BOSS	Burial Operations Support System	This Oracle database application supports interment-related activities at national and state veterans' cemeteries. Closely aligned to AMAS.	2005 ESI Survey, FISMA, IT Procurement Tracking System, EA 2.1, 2006 OMB 300	Quantico, VA - NCA Systems Integration Center	IBM RISC System	AIX (IBM UNIX)	
2726	BRH	Blind Rehabilitation	Migrate VISTA M(UMPS) based Blind Rehab application to J2SE architecture	2005 ESI Survey	Austin, TX - AAC Data Processing Center	Sun RISC System	Solaris	
2732	BVAR	BVAR (Board of Veterans Appeals Remand)	BVAR is a database used to track the reasons for BVA Remands and the validity of the Remands. Also provides reports.	2005 ESI Survey		Compaq Proliant DL580R2	Windows 2000	
1026	C&P Systems	C&P Systems Maintenance and Operations (non-BDN)	C&P Maintenance and Operations, includes C&P systems operating in the VBA corporate environment. These applications are used to support claims processing, tracking, and employee requirements in support of providing service and benefit payments to veterans.	2005 ESI Survey, FISMA, IT Procurement Tracking System, 2006 OMB 300	Austin, TX - AAC Data Processing Center	IBM 7060-H30	ZOS R1.4	
2748	CAMS	Contract Administration Management System	The Contract Administration and Management System (CAMS) is a data management system designed specifically for the VHA Office of Facilities Management (FM) for the management of contract and funding data. It provides a means of sorting and tracking data related to major Architect-Engineer and construction contracts such as contract type, project locations, project status, and contract funding. Provides an accounting system for the control and recording of contract funds. Provides standardized reporting of projects and/or contracts. Allows ad hoc reporting for specific projects or contracts.	2005 ESI Survey		Sun RISC System	UNIX - Other	
2750	CAO	Centralized Accounts Receivable System - Online	Assists Debt Management Center (DMC) in the collection of government overpayments and provides reports and statistical data on the volume and characteristics of the overpayments.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	IBM Mainframe (S/370, S/390)	Z/OS (IBM Mainframe OS-390)	
2751	CAP	Computer Assisted Payment Processing System (CAPPS)	Generates FMS payment transactions from matched vendor invoices and VA facility receiving reports.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	IBM Mainframe (S/370, S/390)	Z/OS (IBM Mainframe OS-390)	
2754	Capital Assets	Capital Assets Project Tracking	Collects data for the Minor and NRM Project Applications and Monthly Project Tracking Reports (PTRs - formerly known as 0051s)	2005 ESI Survey	OTHER Unspecified	x86-based Processors (Intel, AMD)	Windows 2003	
2755	CAPP	Computer Assisted Payment Process	The Computer Assisted Payment Processing application and the Federal Computer Assisted Payment Process application comprise the CAPP/FEDCAP system. CAPP handles commercial business and FEDCAP handles federal business from other agencies. CAPP generates FMS payment transactions from matched vendor invoices, agency invoices, and facility receiving report data that are entered electronically or via a user data entry system. The system also produces fiscal reports for VA customers, to assist in reject and variance resolution.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	IBM Mainframe (S/370, S/390)	OTHER IBM S/390	

## Major Business Application Identification Report

System ID	Short Name	Long Name	System Description	Inventory Source	System Location	System Platform	System OS	Version
2757	CAPRI	Compensation and Pension Records Interchange	A joint VBA-VHA effort to improve the sharing of Compensation & Pension exam information. CAPRI runs on the "CLAIMS" system, which is an application running on Forum hardware but not part of Forum itself	2005 ESI Survey		Hewlett Packard Alpha	VMS	
2760	CAR	Centralized Accounts Receivable System	Supports the Debt Management Center's role in maintaining portfolios of delinquent benefit debts, including foreclosed home loans, active and delinquent education loans, and overpayments of compensation and pension allowances.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	IBM Mainframe (S/370, S/390)	Z/OS (IBM Mainframe OS-390)	
2738	CARIS	CAR Intranet System	Windows based server for online Centralized Accounts Receivable (CAR) System.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	IBM Mainframe (S/370, S/390), x86-based Processors (Intel, AMD)	Z/OS (IBM Mainframe OS-390), Windows 2000	
1047	CARP	Chapter 32 Accounts Receivable Program	One of the Education Service Applications. Maintains and tracks Chapter 32 accounts receivable debt collection. CARP replaced the manual maintenance of accounts receivable subsidiary cards, thus enabling operators to query the database for the specific conditions that prompt collection letters.	2005 ESI Survey, FISMA, EA 2.1, 2006 OMB 300				
2777	CARS/CAROLS	Centralized Accounts Receivables / Centralized Accounts Receivables On-Line	The CARS/CAROLS systems functionally track all United States veterans' debt owed to the Department of Veterans Affairs. The system processes all information related to this debt as cases. Case data size may vary in both amount and complexity of data contained. The application is intended to allow the debt collection process to flow from origination through completion in an efficient manner.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	IBM Mainframe (S/370, S/390)	OS/400 (IBM AS-400)	
2779	CART-CL	CART-CL	Pilot Cardiology data tracking system.	2005 ESI Survey		x86-based Processors (Intel, AMD)	UNIX - Other	
2781	CATS	VISN 2 Capital Asset Tracking System	Web application to collect and track capital asset purchases and requests for funding	2005 ESI Survey		x86-based Processors (Intel, AMD)	Windows 2003	
2787	CCOW	Clinical Context Management Server	Maintains patient context between clinical software applications	2005 ESI Survey	OTHER Unspecified	x86-based Processors (Intel, AMD)	Linux	3.3.7
2788	CCP	Consolidated Co-payments Processing Center	Centralized system for the VHA Revenue Office Veterans Health Administration (VHA) for printing first party bills, and mailing them to the debtor.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	IBM Mainframe (S/370, S/390), x86-based Processors (Intel, AMD)	Z/OS (IBM Mainframe OS-390), Windows 2000	
2791	CCR	Clinical Case Registries	The Clinical Case Registries combines the Hepatitis C and Immunology Case Registry.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	Sun RISC System	Solaris	

## Major Business Application Identification Report

System ID	Short Name	Long Name	System Description	Inventory Source	System Location	System Platform	System OS	Version
3268	CCR-ICR	Clinical Case Registries - Immunology Case Registry	This registry is part of the Clinical Case Registries (CCR). The Immunology Case Registry (ICR), is an administrative and clinical database designed to provide population based data on VA patients infected with the Human Immunodeficiency Virus (HIV). In March 2004, the ICR was moved to the Clinical Case Registries platform and is now known as the CCR:ICR.	2005 ESI Survey		Sun RISC System	UNIX - Other	
1228	CCS	Credit Card System	The CCS is a major application that processes three different types of transaction data for various input interfaces. The types of data include; Prime Vendor, Purchase Card, and Centrally Billed Travel. Prime Vendor, Purchase Card, and Travel data are received daily from Citibank in Data Exchange Files (DEF) format and are loaded into the CCS Oracle relational database that resides on a Compaq 6000 Proliant server. Each day Citibank transmits three compressed DEF files (one for each type of data). The compressed files are delivered to the VA firewall server using the File Transfer Protocol (FTP) over the Internet for further processing.	2005 ESI Survey, FISMA	Austin, TX - AAC Data Processing Center	Dell PowerEdge Server	Windows 2000 running Oracle9i	
1058	CCSE	Centralized Code Sheet Elimination	An on-line data entry and edit of LGY related code sheets.	2005 ESI Survey, FISMA, EA 2.1	Albany, NY - VHA IT Field Office	IBM 2064-2c5	ZOS version 1.5	
2795	CDR	Cost Distribution Report	Cost Distribution Report (CDR) provides summary information about Veterans Affairs costs, Full Time Equivalents (FTE), and workload (number of patient bed days, outpatient clinic stops, etc.). CDR emerged from the Automated Management Information System (AMIS) to provide the VHA with a flexible cost reporting system. The CDR is assembled from information from all VAMCs. CDR provides users with a series of menu-driven screens for online interactive data entry. Each VAMC is able to select from a master list of valid accounts for their facility based on the types of services provided. CDR is processed monthly. A new report called the Monthly Program Cost Report is running concurrently with the CDR in FY04. This report will replace the CDR in FY05.	2005 ESI Survey		MAINFRAME	z900	
2797	Cell Phone Tracker	Cell Phone Tracker	Application used by the VISN to track cell phone inventory, plans, and billing. This application is in development	2005 ESI Survey	OTHER Unspecified	x86-based Processors (Intel, AMD)	Windows 2003	1.0
1060	CH 1606	Montgomery GI Bill Selected Reserve (MGIB-SR) Benefits Payment System	This software application assists eligible service members to further their post-high school education by providing educational assistance.	2005 ESI Survey, FISMA, EA 2.1		BULL 9000	GCOS8 SR5.2	
1068	CH 30	(MGIB) Montgomery GI Bill Active Duty Benefit	This mainframe service builds payment transactions for the BDN for flight, apprenticeship, on-job-training and correspondence benefits. See the PC client system as CH 30 PC	2005 ESI Survey, FISMA, EA 2.1		BULL 9000	GCOS8 SR5.2	

## Major Business Application Identification Report

System ID	Short Name	Long Name	System Description	Inventory Source	System Location	System Platform	System OS	Version
2804	CH 30 PC	Chapter 30 Personal Computer	This application processes CH30 benefits for flight, apprenticeship, correspondence and on-the-job training programs for veterans.	2005 ESI Survey		IBM PC	DOS	
1064	CH 31	Vocational Rehabilitation	This system provides Chapter 31 major vocational rehabilitation and employment benefit processing; including, payment, award, and accounting processing.	2005 ESI Survey, FISMA, IT Procurement Tracking System, EA 2.1	HINES ITC	BULL 9000	GCOS8 SR5.2	
1067	CHAIRS	Chapter 35 Alternate Input Replacement System	One of the Education Service Applications. CHAIRS is a Windows-based application, which performs additional CH35 transactions that cannot be done in BDN. It allows the RPOs and Manila to remotely log on to the Hines BDC to enter CH35 transactions.	2005 ESI Survey, FISMA, EA 2.1, 2006 OMB 300		x86-based Processors (Intel, AMD)	Windows Other	
2806	CHAMPVA	Civilian Health and Medical Program of the Department of Veterans Affairs	CHAMPVA (Civilian Health and Medical Program of the Department of Veterans Affairs) is a healthcare benefit program designed for the dependents of certain veterans. Administered by the Health Administration Center (HAC), Denver, Colorado. CHAMPVA shares the cost of necessary healthcare services and supplies with eligible beneficiaries. The CHAMPVA Eligibility & Payment Functions (CVA) database is used by HAC for the administration of the CHAMPVA program.	2005 ESI Survey		DEC ALPHA	VMS	
2807	Chapter 32	Post Vietnam Era Veteran's Education Assistance Program (VEAP)	TBD	2005 ESI Survey		BULL 9000	GCOS8 SR5.2	
2808	Chapter 35	Dependents Education Assistance (DEA) Benefits Payment System	This system provides payments to entitled widows, and orphans while attending a college or other authorized training institution. The official master record is maintained on a tape file and processed by computer programs that normally update the entire file twice weekly. There are over 60 different transaction types processed. Transactions come in from VA regional offices by both mail and the Benefits Delivery Network. We also process input from Treasury and other VADPCs.	2005 ESI Survey		BULL 9000	GCOS8 SR5.2	
2812	CICSP	Continuous Improvement in Cardiac Surgery Program	The Continuous Improvement in Cardiac Surgery Program (CICSP) database is a research-derived database containing information on all patients who undergo cardiac surgery at a VAMC within the VA Cardiac Surgery Program. The primary purpose of this database is to improve the quality of care for veterans receiving cardiac surgery by providing information to care provider teams for self-assessment and quality improvement purposes.	2005 ESI Survey		x86-based Processors (Intel, AMD)	Windows NT	
2815	CIO	CIO 776	Electronic Time and Attendance and IFCAP for HSITES. Employees enter leave requests, overtime or comp time earned requests. Timekeepers post time cards for supervisory approval. Processed timecard information is e-mailed to Austin for payment.	2005 ESI Survey		Hewlett Packard Alpha	VMS	

## Major Business Application Identification Report

System ID	Short Name	Long Name	System Description	Inventory Source	System Location	System Platform	System OS	Version
1069	CIO Tracking	Chief Information Officer Tracking	The CIO Tracking is an issue and assignment tracking solution to effectively implement and track tasks given by the CIO.	2005 ESI Survey, Project SSP	Austin, TX - AAC Service Delivery Center	x86-based Processors (Intel, AMD), Sun RISC System	Solaris, Windows 2003	
2841	Clinic Check-In System	Clinic Check-In System	Allows patients to check in for appointments by either swiping their VIC card in a card reader or entering their SSN. If there all information is complete, then they can sit down and avoid standing in line. Checkout forms also print for their appointment.	2005 ESI Survey	Phoenix VAMC	Digital Equipment (Alpha)	VMS	
2846	Clinical Care Registry	Clinical Care Registry	A Vista product that assists with the maintenance of patient health in an outpatient setting.	2005 ESI Survey	Philadelphia VAMC	Hewlett Packard RISC System	OTHER Unspecified	1
2858	CMAX	CMAX	Imaging Archive System	2005 ESI Survey		Sun RISC System	Solaris	
2859	CMD	Capacity Management Database	The Capacity Management Database (CMD) is designed to track computer resource usage of the systems running the VISTA. Information derived from CMD is used to assess the impact of planned new software products, identify the ramifications of archiving and purging, recognize emerging problems through database analysis, and validate sizing model expectations. Data for CMD is captured from VISTA systems in real time. Accumulated data is processed at each site and the results are transmitted to CMD using MailMan messages. Data can be added to CMD daily, along with the monthly updates provided by the VISTA sites. The users of CMD include the Office of Information (OI), VISN CIOs, and IRM staff. Alerts VISTA system owners to potential performance problems.	2005 ESI Survey		DEC ALPHA	VMS	
2860	CMIS	Care Management Information System	The Construction Management Information System (CMIS) is a management tool to track the progress of active VHA major, lease, enhanced-use, and parking projects. It is used to measure performance and provide information for internal and external use. Provides performance measures for the VHA Facilities Management program. Tracks construction projects including financial information.	2005 ESI Survey		x86-based Processors (Intel, AMD)	Windows NT	
2867	CNH	Community Nursing Home (CNH)	The Community Nursing Home (CNH) database contains a list of all Community Nursing Home facilities under local contract to VHA. Each day all VA Medical Centers (VAMC) that have a contract with a CNH enter information about the CNH into the Fee Basis module of VISTA. Quarterly reports are sent to the CNHs, VAMCs, Veterans Integrated Service Networks (VISNs), Geriatrics & Extended Care Strategic Healthcare Group, and VA Central Office (VACO). Provides address listing of all CNHs under local contract.	2005 ESI Survey		MAINFRAME	z900	
2866	CNH	Community Nursing Home	Associated with the care of veterans in community nursing homes. Provides information describing nursing homes such as type (VA contract, non-VA paid), level of care, capacity, per diem rates, Medicare/Medicaid coverage, etc.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	IBM Mainframe (S/370, S/390)	Z/OS (IBM Mainframe OS-390)	

## Major Business Application Identification Report

System ID	Short Name	Long Name	System Description	Inventory Source	System Location	System Platform	System OS	Version
2868	CNP	Compensation and Pension Mini-Master File	CNP is an extract of the C&P master file maintained at Hines ITC. Planners primarily use this SAS formatted file of selected fields.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	IBM Mainframe (S/370, S/390)	Z/OS (IBM Mainframe OS-390)	
2875	Common BDN Services	Common BDN Services (End-of-day, Security, and Common Commands processing)	The end of day processing (EOD) runs every day TP processing is available for update by the BDN users.	2005 ESI Survey		BULL 9000	GCOS8 SR5.2	
2877	Compliance	Compliance Coding Module	MCCR Billing Package	2005 ESI Survey		x86-based Processors (Intel, AMD)	Windows 2003	
2884	Contract Tracker	Contract Tracker	Web and database application used to track VISN contracts	2005 ESI Survey	OTHER Unspecified	x86-based Processors (Intel, AMD)	Windows 2003	
1249	Corporate WINRS	WINRS (current)	An automated case management system supporting the VR&E program, replaced the stand-alone WINRS application developed by VBA staff in the late 1990s. It provides case management and other IT support to VR&E and runs in the VBA corporate information-processing environment.	2005 ESI Survey, FISMA	VBAVACO - Contractor (IMC)	E10K - SUN	Solaris 9.0	
1078	COVERS	Control of Veterans Records	An MS Windows-based client/server application using bar code technology to support RO and RMC folder activities, including requests, mail, search and external transfer.	2005 ESI Survey, FISMA, EA 2.1	Austin, TX - AAC Service Delivery Center	E10K - SUN	Solaris 9.0	
1073	COWC	Committee on Waivers and Compromises	A database system used to assist the committee on waivers and compromises and their staff to manage and report on activity at the Regional Offices.	2005 ESI Survey, FISMA, EA 2.1				
2891	CP&E	HAC Claims Processing and Eligibility System	The Veterans Affairs Health Administration Center's (HAC) primary mission is to manage and operate federal benefits programs for veterans and their family members. The programs that comprise CP&E include benefits management, eligibility determination, customer service, outreach and education, claims processing, appeals, grievances, and fraud, waste, and abuse (FWA) prevention.	2005 ESI Survey	Denver, CO - VHA Health Administration Center	Hewlett Packard RISC System	OTHER Unspecified	
2889	CP&E Fiscals	CP&E Fiscals	Fiscal transactions are used to make adjustments related to underpayment, overpayment, and debt repayment. Fiscal transactions are independent of award processing and deal primarily with Special Payments, the creation and elimination of A/R segments (account receivables) and disbursement of unassociated monies. After all fiscal transaction processing has been completed for the day, an end-of-day batch run processes, creating the data necessary for the Daily Fiscal Transaction Report of the previous day.	2005 ESI Survey		BULL 9000	GCOS8 SR5.2	
1084	CPB	Condo PUD (Planned Unit Development) Builder	CPB is a public Internet site that allows people to look up information about VBA approved Condominiums, PUDs, and Builders. Condo and PUD is not updated.	2005 ESI Survey, FISMA, EA 2.1		HP Compaq Proliant DL580R2	Windows 2000	
2892	CPRS	Computerized Patient Record	Computerized Patient Record GUI Interface to VISTA	2005 ESI Survey	OTHER Unspecified		OTHER Unspecified	1.0.25.42

## Major Business Application Identification Report

System ID	Short Name	Long Name	System Description	Inventory Source	System Location	System Platform	System OS	Version
2895	CPTS	Centralized Property Tracking System - out by Sept/2005 going to the portal environment - Fannin	CPTS is a Web-based system that provides LGY's Property Management Oversight Unit (PMOU) in Nashville, TN, with the information it needs to monitor the progress and performance of Ocwen Financial Corporation (an external property management company) in managing and selling VA properties and to process sales proceeds. The PMOU reports this information to the VBA Central Office (CO). CPTS is accessible to VBA employees only. Employees log in through and are authenticated by VIP. Once the authentication process has been successfully completed, the employee will access CPTS via a menu of options on the left-hand side of the web page.	2005 ESI Survey	Austin, TX - AAC Service Delivery Center	x86-based Processors (Intel, AMD)	Windows 2000	
2522	CRCR	Community Residential Care Report	The Community Residential Care Report is a listing of all facilities approved for care by the VA. Information about these facilities is entered into the Fee Basis module of the Veterans Health Information Systems and Technology Architecture (VISTA) by every VAMC that has an agreement with a facility.	2005 ESI Survey		MAINFRAME	z900	
2896	Credentialing	Credentialing	Provider Credentialing system	2005 ESI Survey		Hewlett Packard RISC System	Windows 2003	
2898	CRP	VBA Corporate Applications	AAC to host VBA Corporate Applications on the Sun E10K. Application work to be done by VBA.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	Sun RISC System	Solaris	
2903	CSAM	Common Security Application Manager	A Microsoft Windows-based client/server application that maintains VBA applications, operations, and relationships on the corporate database for purposes of administering security through CSUM. This application will allow you to create applications, roles, operations, templates, and relationships that will be using the common security functionality.	2005 ESI Survey		E10K SUN	Solaris 9.0	
1074	CSS	Common Security Services	The CCS is a major application that processes three different types of transaction data for various input interfaces. The types of data include; Prime Vendor, Purchase Card, and Centrally Billed Travel. Prime Vendor, Purchase Card, and Travel data are received daily from Citibank in Data Exchange Files (DEF) format and are loaded into the CCS Oracle relational database that resides on a Compaq 6000 Proliant server. Each day Citibank transmits three compressed DEF files (one for each type of data). The compressed files are delivered to the VA firewall server using the File Transfer Protocol (FTP) over the Internet for further processing.	2005 ESI Survey, FISMA, EA 2.1			UNIX - Other	
2905	CSUM	Common Security User Manager	A Microsoft Windows-based client/server application that VBA Security Officers and IT personnel will use for granting security access to applications and "Sensitive file" processing.	2005 ESI Survey		E10K SUN	Solaris 9.0	

## Major Business Application Identification Report

System ID	Short Name	Long Name	System Description	Inventory Source	System Location	System Platform	System OS	Version
2907	CTRDB	Consolidated Trainee Registration Database	Veterans Health Administration (VHA) Directive 2003-032 establishes policy for the collection of information that is necessary for the administration of VHA's affiliated clinical training programs. is VHA policy that all trainees who come to VA for their clinical training must be registered using the "New Person" file in the Veterans Health Information Systems and Technology Architecture (VistA). This application receives clinical trainee core data in HL7 format from medical center VistA systems and consolidates it into a Master National Database.	2005 ESI Survey	OAA Academic Information Management Center	x86-based Processors (Intel, AMD)	Windows 2003

2974	DM2	Debt Management System	This system manages the communication of VHA first party debts referred to the VBA Debt Management Center for debt collection activities.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	IBM Mainframe (S/370, S/390), x86-based Processors (Intel, AMD)	Z/OS (IBM Mainframe OS-390), Windows 2000	
2975	DMI	Data Management Interface	Interface engine that moves data between VHA VISTA Applications and AAC Applications.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	IBM Mainframe (S/370, S/390)	Z/OS (IBM Mainframe OS-390)	

## Major Business Application Identification Report

System ID	Short Name	Long Name	System Description	Inventory Source	System Location	System Platform	System OS	Version
1121	DMS	Document Management System	The DMS is a high volume system explicitly designed for the complex and diverse VA FSC DMS document processing and management requirements. Capabilities provided with the current version of the ViewStar software include remote access to the DMS utilizing the Internet. The DMS supports other major applications processing at the VA FSC such as Credit Card System (CCS) and the Hospital Care Processing System (HCPS) that supports the Department of Immigration and Health Services (DIHS).	2005 ESI Survey, FISMA, IT Procurement Tracking System	Austin, TX - AAC Data Processing Center	Dell PowerEdge Server	Windows 2003	
1086	DMU	Data Management Utility	Data Management Utility is a tool that provides basic maintenance functions for Corporate Reference Tables and related information. This application provides basic add/update/delete to tables that contain reference information used by corporate applications. Presently, it is maintaining tables for the FAS application (see VN C&P Pilot Awards). It includes Power of Attorney, VA organizations and several tables for the MAP-D application.	2005 ESI Survey, FISMA, EA 2.1		E10K SUN	Solaris 9.0	
2986	DOR	Distribution of Operational Resources	Integrates workload, quality, and fiscal data for VBA operations. The purpose of the system is to relate the cost of operations to other operational performance data for analysis at the regional office level.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	IBM Mainframe (S/370, S/390)	Z/OS (IBM Mainframe OS-390)	
2524	Drug Acct DB	Drug Accountability Database	The Drug Accountability database is a database that collects information on medication dispensed to both inpatient and outpatient veterans who receive care from the VA. Information for the Drug Accountability database is extracted from a number of files found within the VISTA environment. Provides a national database containing information on drug dispensing at VAMCs. Provides reporting at local, regional, and national levels for VAMCs and VISNs. Provides monthly, quarterly, and annual reports to the VAMCs and VISNs. Provides the translation of local pharmaceutical names to common names. Provides confirmation to VAMCs that MailMan messages have been received successfully by the Hines facility.	2005 ESI Survey		x86-based Processors (Intel, AMD)	Windows NT	
3003	DSS	Decision Support System	The Decision Support System (DSS) enables the Veterans Affairs hospitals to compute their costs for treating individual patients and providing specific services. It also allows the review of financial and clinical corporate data for management and quality improvement purposes. It provides information for clinical studies on groups of patients and more. At each VAMC a client/server-based application provides a Graphic User Interface for the presentation of data.	2005 ESI Survey		x86-based Processors (Intel, AMD)	Windows 2003, Windows 2000	

## Major Business Application Identification Report

System ID	Short Name	Long Name	System Description	Inventory Source	System Location	System Platform	System OS	Version
1090	DSS	Legacy Decision Support System	The Decision Support System (DSS) enables the Veterans Affairs hospitals to compute their costs for treating individual patients and providing specific services. It also allows the review of financial and clinical corporate data for management and quality improvement purposes. It provides information for clinical studies on groups of patients and more. At each VAMC a client/server-based application provides a Graphic User Interface for the presentation of data.	2005 ESI Survey, FISMA, 2006 OMB 300			Windows 2000, Windows NT	
3004	DSS	Decision Support System	The Decision Support System (DSS) is a derived database built from standard VHA data sources. DSS uses clinical and financial data to provide state-of-the-art activity based costing and clinical productivity analyses.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	IBM Mainframe (S/370, S/390)	Z/OS (IBM Mainframe OS-390)	
3026	E Policy Orchestrater	E Policy Orchestrater	Provides repository for virus protection data and files.	2005 ESI Survey	OTHER Unspecified	x86-based Processors (Intel, AMD)	Windows 2003	3.5
3030	E3R	Enhancement Request (E3R)	Enhancement Request (E3R) and National Enhancement Requests were the previous names of databases for what is now commonly called Electronic Error and Enhancement Reporting (E3R). This is a module running on FORUM that offers VHA staff a means for recommending enhancements to VISTA, previously known as Distributed Hospital Computer Program (DHCP). E3R tracks and logs the entire discussion process on these enhancement proposals. Permits an arbitrator to enter comments, to reassign the request to the appropriate package, and, along with the package developer, to accept or deny the request. Produces several reports available to both users and developers.	2005 ESI Survey		DEC ALPHA	VMS	
3031	eAppraisal	eAppraisal	eAppraisal is an ASP web application used to upload appraisals and store them in FileNet, the LGY document management system. Appraisers and lending institutions (~40,000 individuals) can view appraisals for loans they are processing. eAppraisal uses a third party tool called FileUp to manage the actually upload/download.	2005 ESI Survey		Compaq Proliant DL580R2	Windows 2000	
3034	EAS	Environmental Agents System	Combination of application inputs for Agent Orange, Persian Gulf War and Dependents of Gulf War Veterans and Ionized Radiation registries.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	Sun RISC System	Solaris	
3039	ECAP	Enrollment Certification Automated Processing	ECAP uses a dedicated server and PCs to process electronic enrollment certifications and notices of change in student status received from schools using VACERT, the electronic education certification program. ECAP tries to identify the education benefit, establish pending issues, and process education awards through to authorization. ECAP currently processes chapter 30 re-enrollment certifications and notices of change in student status.	2005 ESI Survey			Windows 2000	
3040	ECC	Electronic Commerce Contraction	Automated Acquisition tool, initially for procurement of computer hardware and software-2 contracts	2005 ESI Survey	Austin, TX - AAC Data Processing Center	x86-based Processors (Intel, AMD)	Windows 2003	

## Major Business Application Identification Report

System ID	Short Name	Long Name	System Description	Inventory Source	System Location	System Platform	System OS	Version
3041	ECD	Electronic Card System	ECS (Ecard) for VA's Veterans Canteen Service (VCS) is a re-loadable card program that each canteen uses to record meals served to students, doctors, volunteers, etc., and provides detailed information for billing purposes to appropriate parties.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	Sun RISC System	Solaris	
1099	eCMS	Electronic Contract Management System	This E-Commerce project is designed to introduce electronic contracting solutions in VA contracting operations. It provides the tools and procurement data that allow VA contracting professionals to make informed buying decisions. It is integrated with existing related legacy financial and logistics components, and (eventually) with the VA integrated financial and logistics system.	2005 ESI Survey, FISMA, EIB Milestone 2	Austin, TX - AAC Service Delivery Center	x86-based Processors (Intel, AMD)	Windows 2003	2.1
3043	EDB	Enrollment Database	Processes all national enrollment applications and acts as the official repository of all VHA information regarding enrollment.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	Hewlett Packard RISC System	HP-UX	
3045	EDC	Electronic Data Interchange (EDI) - Veterans Canteen Service	The VHA Veterans Canteen Service (VCS) utilizes EDI for the electronic funds transfer payment process. The Financial Services Center (FSC) EDI staff directly supports these efforts and uses this code to report CPU, DASD, and labor charges.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	IBM Mainframe (S/370, S/390)	Z/OS (IBM Mainframe OS-390)	
3046	EDD	Electronic Data Interchange (EDI) for OA&MM's, Denver Distribution Center (DDC)	EDD is the EDI processing of invoices for the DDC.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	IBM Mainframe (S/370, S/390)	Z/OS (IBM Mainframe OS-390)	
3047	EDE	Electronic Data Interchange (EDI) for VBA/MLAC legacy systems	EDE is a file transfer of FMS transaction data between VBA legacy systems and FMS.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	IBM Mainframe (S/370, S/390)	Z/OS (IBM Mainframe OS-390)	
3048	EDF	Electronic Data Interchange (EDI) - Financial	EDF is used to exchange vendor invoice data in common business documents electronically between VA and other business entities.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	IBM Mainframe (S/370, S/390)	Z/OS (IBM Mainframe OS-390)	
3049	EDI	Electronic Data Interchange	EDI technology is used by the AAC in support of multiple applications to exchange data in common business documents electronically between VA and other business entities.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	IBM Mainframe (S/370, S/390)	Z/OS (IBM Mainframe OS-390)	
3051	EDL	Electronic Data Interchange (EDI) - Loan Guaranty Processing (Mortgage Defaults)	VBA uses EDI to service the administration of veterans' Loan Guaranty benefits. Financial Services Center (FSC) EDI staff directly supports these efforts.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	IBM Mainframe (S/370, S/390)	Z/OS (IBM Mainframe OS-390)	
3050	EDL	Electronic Data Interchange (EDI) - Loan Guaranty Processing (Mortgage Defaults)	VBA uses EDI to service the administration of veterans' Loan Guaranty benefits. Financial Services Center (FSC) EDI staff directly supports these efforts.	2005 ESI Survey	Austin, TX - AAC Service Delivery Center	IBM Mainframe (S/370, S/390)	Z/OS (IBM Mainframe OS-390)	

## Major Business Application Identification Report

System ID	Short Name	Long Name	System Description	Inventory Source	System Location	System Platform	System OS	Version
3052	EDM	Electronic Data Interchange (EDI) - Medical Care Cost Recovery (MCCR)	The Medical Care Cost Recovery (MCCR) Program Office uses EDI in administering third-party health claims. The Financial Services Center (FSC) EDI staff directly supports these efforts.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	x86-based Processors (Intel, AMD)	OTHER Unspecified	
3054	EDP	Electronic Data Interchange (EDI) - Procurement	Data is used to translate VA purchase orders; requests for quotes, bids, vendor invoices, vendor acknowledgments; and vendor registration into agreed-upon formats for processing between VA and EDI trading partners.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	IBM Mainframe (S/370, S/390)	Z/OS (IBM Mainframe OS-390)	
3055	EDS	Electronic Data Interchange (EDI) for Prime Vendor Subsistence	EDI processing of invoices and payments under the Prime Vendor Subsistence program.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	IBM Mainframe (S/370, S/390)	Z/OS (IBM Mainframe OS-390)	
3059	EES	Environmental Epidemiology Service	The AAC receives a roster of social security numbers from the Department of Defense on a quarterly basis. These SSNs are for recently-discharged veterans who served during the Persian Gulf Era. The output is contained in SAS file format.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	IBM Mainframe (S/370, S/390)	Z/OS (IBM Mainframe OS-390)	
3058	EEXS	Entrance and Exit Survey	This survey program collects responses from newly hired full time employees and employees that are leaving VA employment. The data is available to all stations within VA.	2005 ESI Survey	OTHER Unspecified	x86-based Processors (Intel, AMD)	Windows 2003	
3061	EIP	EES IFCAP	EES (Employee Education System) Customer IFCAP system administration support.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	x86-based Processors (Intel, AMD)	Windows NT	
1100	ELF	Electronic Lender Folder	Maintains lender files and information, and enables the majority of lender processing functions to be automated. Tracks and report various categories of data on a given lender. Enables Loan Guaranty staff to track lender patterns and deficiencies and identify problem lenders.	2005 ESI Survey, FISMA, EA 2.1		E10K SUN	Solaris 9.0	
3069	Emtec	Emtec Replacement	Replaced the old Emtec ICU DB	2005 ESI Survey		x86-based Processors (Intel, AMD)	Linux	9i
3070	Encoder	Encoder	Sophisticated ICD-9-CM and CPT encoder, DRG Grouper and Clinical Code Editor	2005 ESI Survey		Hewlett Packard RISC System	Windows 2003	
3076	Energy Usage	Energy usage at NCA, VBA, and VHA owned and leased facilities	VA Headquarters sends the Annual Energy Report to DOE at the end of each FY. The VA energy data for DOE are collected using this web application. This data is available from FY 2000 and can be produced for a selected VISN or National.	2005 ESI Survey	OTHER Unspecified	x86-based Processors (Intel, AMD)	Windows 2003	
3078	Enhanced Sharing Database	VHA Enhanced sharing agreements and scarce medical Specialist database	Title 38 U.S.C., Section 8153 (g) requires an annual report to Congress on the use of sharing authority and how the use of that authority can be improved to serve the health care needs of veterans. It is necessary for VHA to establish and maintain a more sophisticated database for Enhanced Sharing Authority that is updated quarterly. The database provides a centralized location for collection of data on Enhanced Sharing Authority that will be used to allow VHA to proactively review activities and to respond to questions from various oversight organizations.	2005 ESI Survey	OTHER Unspecified	x86-based Processors (Intel, AMD)	Windows 2003	

## Major Business Application Identification Report

System ID	Short Name	Long Name	System Description	Inventory Source	System Location	System Platform	System OS	Version
3079	Enterprise E-mail	The VHA Consolidated Exchange 2003 Enterprise E-mail System	This system consist of the consolidated Enterprise E-mail system for VHA and components of the VA such as the VACO offices and other VA program offices. Besides the backend it also included ancillary services such as VPNless remote access to e-mail and usage of Outlook 2003 and also Outlook Web Access Clients.	2005 ESI Survey	Hines, IL - VHA IT Field Office	x86-based Processors (Intel, AMD)	Windows 2003	2003
3083	EOP	ePolicy Orchestrate	TBD	2005 ESI Survey		x86-based Processors (Intel, AMD)	Windows 2003, Windows 2000	
3084	EP Evaluator	TBD	Laboratory statistical application	2005 ESI Survey		x86-based Processors (Intel, AMD)	Windows 2003	
3027	e-Payroll	Electronic Payroll System	As part of the e-Payroll initiative, the Office of Personnel Management (OPM) has aligned VA with the DFAS. VA has provided DFAS with high-level VA requirements for payroll systems and services. System is still in development and not yet deployed.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	IBM Mainframe (S/370, S/390)	OS/400 (IBM AS-400)	
3053	EPD	Electronic Payroll Deduction	Uses VCS issued credit cards much like a company credit card. Based on system calculations, payments are deducted from biweekly salary of VA customers with a balance on their card as posted to their account in PDS.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	Sun RISC System	UNIX - Other	
3085	EPH	Lockbox, 3rd Party EDI	An automated method for receipt and tracking of claim payments and associated data within the Department of Veterans Affairs.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	x86-based Processors (Intel, AMD)	OTHER Unspecified	
3087	EPI	Emerging Pathogens Initiative	The Emerging Pathogens Initiative (EPI) database contains Emerging Pathogens information from the local VAMCs. The EPI software package allows the VA to track Emerging Pathogens on the national level without additional data entry at the local level. The results from aggregation of data can be shared with the appropriate public health authorities including non-VA and the private health care sector allowing national planning, formulation of intervention strategies, and resource allocations.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	IBM Mainframe (S/370, S/390)	Z/OS (IBM Mainframe OS-390)	
3100	EPSC	Eastern Pacemaker Surveillance Center Database (EPSC)	The Eastern Pacemaker Surveillance Center Database supports the Eastern Pacemaker Surveillance Center (EPSC) staff in its function of monitoring some 8,000 VHA patients who have implanted pacemakers. The database stores medically useful information about the patients and their pacemaker.	2005 ESI Survey		DEC ALPHA	Windows NT	
3102	ESAD	VSSC/KLF Enhanced Sharing Agreement (ESAD)	This database contains entries for all Enhanced Sharing Agreements (Title 38 U.S.C, 8153 and 7409.) including locum tenens and scarce medical specialists. The information contained in this database will be used for monitoring of VHA physician FTE and expenditures and for reporting to oversight organizations (Annual Report to Congress on Sharing of Healthcare Resources). By contractual agreement, includes references to AAMC and MGMA salary rates for MD services quarterly and annual updates for funds obligated and FTE.	2005 ESI Survey		x86-based Processors (Intel, AMD)	Windows 2003	

## Major Business Application Identification Report

System ID	Short Name	Long Name	System Description	Inventory Source	System Location	System Platform	System OS	Version
3104	ESE	Essence	A VHA Geographic Information System (GIS) for Biohazard monitoring.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	x86-based Processors (Intel, AMD)	Windows NT	
3105	ESP	Energy Savings Projects (ESP)	The Energy Savings Projects (ESP) database tracks the status of projects designed to save energy. Only the projects not completely funded by the VA are included in this database. Users manually enter data for the ESP via the website maintained by the Veterans Integrated Service Networks (VISN) Support Service Center (VSSC). Fulfills Congressional reporting mandate.	2005 ESI Survey		MAINFRAME	z900	
3107	ESS/Remedy Help Desk Application	Remedy Help Desk Component of VHA Enterprise Support Solution (ESS) System	The Remedy Help Desk application is a component of the Enterprise Support Solution (ESS) System used in the Veterans Health Administration (VHA) for help desk and information technology (IT) service request management. Remedy Help Desk is a commercial help desk/problem management application that has been customized for VHA.	2005 ESI Survey		x86-based Processors (Intel, AMD)	Windows 2003	6.3
1123	eTravel	Electronic (Web-based) Travel System	Zegato e-Travel, web-based COTS system.	2005 ESI Survey, FISMA, EIB Milestone 3C	Austin, TX - AAC Service Delivery Center		OTHER Unspecified	
1122	EXECVA	Executive VA Contact Management	EXECVA is a system for managing high visibility and high priority Veteran's issues that have been referred to the Office of the secretary and other executive offices.	2005 ESI Survey, Project SSP	OTHER Unspecified	x86-based Processors (Intel, AMD)	Windows 2003	
3144	F31	FMS (VHA Office of Compliance and Business Integrity)	FMS processing/modification directly attributable to VHA's Office of Compliance and Business Integrity.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	IBM Mainframe (S/370, S/390)	Z/OS (IBM Mainframe OS-390)	
3145	F32	FMS (Health Administration Center)	Process the Health Administration Center's (HAC) interface files through a FMS test environment and have normal files created for the HAC to retrieve and send data to Treasury for Treasury to process and send EOB's and fake check printouts to the HAC	2005 ESI Survey	Austin, TX - AAC Data Processing Center	IBM Mainframe (S/370, S/390)	Z/OS (IBM Mainframe OS-390)	
3146	FAD	Federal Assistance Awards Data System	Reports the distribution of VA assistance and award monies by state and county.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	IBM Mainframe (S/370, S/390)	Z/OS (IBM Mainframe OS-390)	
1127	FBS	Fiduciary Beneficiary System	Fiduciary and Field Examination (F&FE) personnel at VBA Regional Offices (ROs) nationwide use the FBS system	2005 ESI Survey, FISMA, EA 2.1	Austin, TX - AAC Service Delivery Center	x86-based Processors (Intel, AMD)	Windows 2000	
3150	FCDM	VSSC Financial Clinical Data Mart (FCDM)	The Financial Clinical Data Mart (FCDM) is an interactive information management system that uses SQL and On-Line Analytic Processing (OLAP) cube technology to build large, customized national databases. This technology allows VHA to integrate clinical and financial data designed for rapid queries and reporting. The data cube provides cost & quantity for prosthetic devices, supplies, and repairs by facility & vendor. Useful for analyses and trending by utilization, unit and average cost by line item class or individual HCPC.	2005 ESI Survey		x86-based Processors (Intel, AMD)	Windows 2003	
3151	FDR	CoreFLS Data Repository	Read-only data repository for FY 2004 accounting data from CoreFLS.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	Sun RISC System	UNIX - Other	

## Major Business Application Identification Report

System ID	Short Name	Long Name	System Description	Inventory Source	System Location	System Platform	System OS	Version
3152	FED	Federal Computer Assisted Payment Processing	Automates accounting data entry to CAPPS for Federal purchases.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	IBM Mainframe (S/370, S/390)	Z/OS (IBM Mainframe OS-390)	
3154	FEE	Non-VA Fee Basis Medical System (FEE)	The Fee Basis Medical and Pharmacy System (FEE) automates the VHA Fee for Service program. It authorizes and pays private physicians, hospitals, and pharmacists for products and services provided to veterans approved for the program.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	IBM Mainframe (S/370, S/390)	Z/OS (IBM Mainframe OS-390)	
3155	FFPS	FFPS (Funding Fee Payment System)	FFPS is a component of PAY.GOV. It is used to report VA Home Loan funding fees to Treasury, automate collection of funding fees, and report the funding fees to VA. The major portion of the application is operated and hosted by Treasury, but daily collections report files are delivered to the Sun for processing.	2005 ESI Survey		Compaq Proliant D1380	Windows 2000	
3156	FFS	Federal Financial System for GAO	Software for GAO's Financial Management System (FMS).	2005 ESI Survey	Austin, TX - AAC Data Processing Center	IBM Mainframe (S/370, S/390)	Z/OS (IBM Mainframe OS-390)	
3157	FHIE	Federal Health Information Exchange (FHIE)	Data repository that receives information from the Department of Defense. It provides the VA with access to the veteran's previous health information.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	x86-based Processors (Intel, AMD)	Windows NT	
3166	FileNet	FileNet	FileNet is a document management system. It resides on the inside of the VBA firewall. It is used by several LGY applications to manage documents: eAppraisal uses it to store appraisals for VBA loans. VBA personnel can view these documents using a FileNet Open Client. External users (lenders and appraisers) must use eAppraisal to access documents stored in FileNet. Eli uses FileNet to store copies of letters and other documents generated by that application (VBA users). VBA users using FileNet Open Client store documents as their discretion - we do not manage this function LGY likes this product and plans to expand its use in the future.	2005 ESI Survey		Compaq Proliant DL580R2	Windows 2000	
3168	FIM	Functional Status and Outcomes Database (FSOD)	Collects recovery data on patients. Enhanced by the AAC to centralize the data into a national Physical Medicine & Rehabilitation Services (PM&RS) database warehoused at the AAC, and provide online network connectivity.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	x86-based Processors (Intel, AMD), IBM Mainframe (S/370, S/390)	Windows NT, Z/OS (IBM Mainframe OS-390)	
3170	FIRM	Foundation Information for Real Property Management (FIRM)	The Foundation Information for Real Property Management (FIRM) system was developed by the General Services Administration (GSA) to help federal agencies manage their real property assets. Inactive, replaced by SF.	2005 ESI Survey		Sun RISC System	UNIX - Other	
3173	FMI	Financial Management Information System	FMI is the primary financial accounting and reporting system for VA's Veterans Canteen Service (VCS). VCS manages over 170 canteen locations around the country, providing retail shops, pay phone services, food service, and other services.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	IBM Mainframe (S/370, S/390)	Z/OS (IBM Mainframe OS-390)	

## Major Business Application Identification Report

System ID	Short Name	Long Name	System Description	Inventory Source	System Location	System Platform	System OS	Version
3175	FMP	Foreign Medical Program (FMP)	The Foreign Medical Program (FMP) is a healthcare benefits program designed for US veterans with Veterans Affairs-rated service-connected conditions who are residing or traveling abroad (Canada and Philippines excluded).	2005 ESI Survey		DEC ALPHA	VMS	
1131	FMS	Financial Management System	FMS is the VA's 10-yr old core financial system, which contains VA's single SGL for financial reporting and is the single financial system for all administrative (non-benefit) payments and accounting.	2005 ESI Survey, FISMA, 2006 OMB 300	Austin, TX - AAC Data Processing Center	IBM Mainframe (S/370, S/390)	OS/400 (IBM AS-400)	
2518	Former POW STS	Former Prisoner of War Statistical Tracking System	The Former Prisoner of War (POW) Statistical Tracking System database is a registry designed to comply with Public Law 97-37, the Former Prisoner of War Benefits Act of 1981. This database contains information about the Medical Evaluation Program for ex-POWs at VA facilities.	2005 ESI Survey		MAINFRAME	z900	
3180	FPD	Federal Procurement Data System	Data collection and report system that receives input via the FALCON system from all VA facilities on all VA-executed contracts.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	IBM Mainframe (S/370, S/390)	Z/OS (IBM Mainframe OS-390)	
3182	FPS	File and Print Services	Provides centralized file and print services for workstations connected to the AAC LAN. Provides services to selected resident organizations.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	x86-based Processors (Intel, AMD)	Windows NT	
3184	FRN	Financial Reports System	Provides customer-friendly menus and online help. FRN provides Windows-based reports, graphs, and text files from the FRN database which can then be downloaded to a local PC or network. Also known as PC FRS.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	IBM Mainframe (S/370, S/390)	Z/OS (IBM Mainframe OS-390)	
3187	FSOD	Functional Status and Outcome Database (FSOD)	The Functional Status and Outcome Database (FSOD) is designed to capture and track information about rehabilitative care throughout the VA. FSOD supports the entry of information from acute and sub-acute inpatient rehabilitation programs, as well as a broad range of outpatient rehabilitation programs.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	x86-based Processors (Intel, AMD)	Windows NT	
3189	FUM	Fiscal Menu System	Provides an array of FMS, General Ledger, PAID, and CDR financial reports. FMS, CDR, and General Ledger reports contain non-sensitive data available to all AAC customers. PAID reports contain sensitive data available only to authorized customers.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	IBM Mainframe (S/370, S/390)	Z/OS (IBM Mainframe OS-390)	
3190	GC LAWS	GC LAWS	GC LAWS, developed by the General Counsel Automation Advisory Committee (GCACC) and General Counsel Information Systems Division (GCISD) is a comprehensive software package to accommodate enhanced legal case-matter tracking and workload reporting for the Office of the General Counsel and all Regional Counsel field offices	2005 ESI Survey	OTHER Unspecified	x86-based Processors (Intel, AMD)	Windows 2003, Windows 2000, Windows Other	2.9
3191	GDX	Geographic Distribution Expenditures	System tracks VA expenditures geographically	2005 ESI Survey	Austin, TX - AAC Data Processing Center	IBM Mainframe (S/370, S/390)	Z/OS (IBM Mainframe OS-390)	
3199	GIL	Guaranteed/Insured Loan System	Maintains a detailed statistical master record for each guaranteed or insured loan closed by VA since the beginning of the VA loan program in 1944.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	IBM Mainframe (S/370, S/390)	Z/OS (IBM Mainframe OS-390)	

## Major Business Application Identification Report

System ID	Short Name	Long Name	System Description	Inventory Source	System Location	System Platform	System OS	Version
3208	GRECC	Geriatric Research, Education and Clinical Centers (GRECC) - Hines	The Geriatric Research, Education, and Clinical Centers (GRECC) database tracks information on the following: • GRECC's administrative functions • Personnel • Research awards and projects • Publications • Clinical programs • Continuing education • Outreach and consultation • Trainee activities • Other professional activities and awards. at GRECC sites enter information throughout the year.	2005 ESI Survey		DEC ALPHA	VMS	
3209	GRS	Gravesite Reservation System	Provides a file of gravesite reservations for dependents of veterans. The system is designed to produce correspondence to be mailed to each reservee requesting confirmation of their intent to use the reserved gravesite.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	IBM Mainframe (S/370, S/390)	Z/OS (IBM Mainframe OS-390)	
3210	GWR	Gulf War Registry (GWR)	The Gulf War Registry (GWR) is a dataset of veterans who have participated in the Persian Gulf War, Operation Iraqi Freedom and had a GWR examination at a Department of Veterans Affairs (VA) medical facility. This centralized registry is maintained to enable VA to keep veterans informed on research findings or new compensation policies through periodic newsletters.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	x86-based Processors (Intel, AMD)	Linux	
3213	HBC	Home Based Primary Care	The Home Based Primary Care (HBC) database receives and compiles data from local Hospital Based Home Care (HBHC) modules at the 100 VAMCs that run home care programs under the Home Based Primary Care program. The primary purpose is to provide Home Based Primary Care management with case-mix, caseload, and other performance information. Provides basis for responding to congressional inquiries as needed, and for providing extracts to Decision Support Service (DSS) on request.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	IBM Mainframe (S/370, S/390)	Z/OS (IBM Mainframe OS-390)	
3219	HEC	Health Eligibility Center	The Health Eligibility Center (HEC) is responsible for determining eligibility of veterans for VHA medical care. The HEC is the authoritative source on Veteran Eligibility and subsequent Enrollment. To be enrolled, a veteran must meet basic eligibility criteria. The HEC gathers all the information needed to make eligibility decisions and records and processes the information using the HEC System.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	IBM Mainframe (S/370, S/390)	Z/OS (IBM Mainframe OS-390)	
3222	HelpDesk	Remedy HelpDesk	Used for monitor and input of all help calls for the entire VISN and all facilities in the VISN	2005 ESI Survey		x86-based Processors (Intel, AMD)	Windows NT	
3227	HEPC	Hepatitis C Registry (HEPC)	This registry is part of the Clinical Case Registries (CCR). The Hepatitis C Extract project was created to meet Hepatitis C Initiative requirements. The VHA Headquarters Infectious Disease Program Office provides surveillance statistics from the Emerging Pathogens Initiative database located in the Austin Automation Center and periodically provides data to other stakeholders such as The House Veterans Affairs Committee.	2005 ESI Survey		Sun RISC System	UNIX - Other	
3228	HER	Health Eligibility Reports	Uses the Master Veteran Record (MVR) to match veteran's social security number or VA claim numbers through various databases and produces report used to determine veterans' eligibility for VHA medical treatment.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	Sun RISC System, IBM Mainframe (S/370, S/390)	UNIX - Other, Z/OS (IBM Mainframe OS-390)	

## Major Business Application Identification Report

System ID	Short Name	Long Name	System Description	Inventory Source	System Location	System Platform	System OS	Version
3255	HQALP	HQ Applicant Log Program	The program logs and tracks applicants applying for open positions. The log program was expanded to include an on-line employment application process and HR specialist resource component.	2005 ESI Survey	OTHER Unspecified	x86-based Processors (Intel, AMD)	Windows 2003	
3256	HR DMS	HR DMS Application	Web and database application used to automate the HR Office	2005 ESI Survey		x86-based Processors (Intel, AMD)	Windows 2003	
3257	HRAPS	HRA Project Oversight System	The Project Oversight System tracks overall progress, milestones, intermediate goals, and lists important intermediate dates for HR&A projects.	2005 ESI Survey	Silver Springs, MD - VHA IT Field Office	x86-based Processors (Intel, AMD)	Windows 2003	
3258	HRC c.Support	HRC c.Support help desk application	GW1 c.Support ( <a href="http://www.gwi.com/">http://www.gwi.com/</a> ) is a commercial off-the-shelf IT help desk application. Through this software, the HRC is able to manage incidents, IT knowledge base, assets, customer records, and customer assistance requests. It has an integrated customer self-service module, automated inventory, custom reporting tool, and administrative toolset. It uses Microsoft Internet Explorer as the front end and Microsoft IIS and SQL as the back end. The vendor delivers the source code making it fully customizable.	2005 ESI Survey		x86-based Processors (Intel, AMD)	Windows 2003	
3259	HRC CRM	Health Revenue Center Customer Relationship Management	The HRC Siebel implementation is a client-server application. It ties together the various components of the HRC's key business units to improve efficiency and streamlines service delivery. It provides for a universal view of the customer, including contact information, activity/issue tracking interaction and transaction history and preferences.	2005 ESI Survey		x86-based Processors (Intel, AMD)	Windows 2003	
3260	HRMPE	Human Resources Management Program Evaluation	In accordance with VA Directive 5024, the purposes of the Human Resources Management self evaluation are to: 1) have executives periodically determine the current status of their human capital program, 2)set specific objectives for improvements and 3)assess progress by measuring objective accomplishments.	2005 ESI Survey	OTHER Unspecified	x86-based Processors (Intel, AMD)	Windows 2003	
3262	Human Subject Stats	Human Subject Stats	Comprehensive human test subject database for research purposes.	2005 ESI Survey	OTHER Unspecified		UNIX - Other	4583.44
3264	IBBA	Intranet BDN/BIRLS Access	A joint project between VBA and VHA to provide more access to BIRLS and BDN data. Accommodates multiple concurrent, query transactions through the Intranet. Is current, live data – no extracts.	2005 ESI Survey		Compaq Proliant DL580R2	Windows 2000	
3269	IDE	Integrated Data for Enforcement Analysis (IDEA)	EPA centralized data repository used for querying	2005 ESI Survey	Austin, TX - AAC Data Processing Center	Sun RISC System, IBM Mainframe (S/370, S/390)	Z/OS (IBM Mainframe OS-390), UNIX - Other	
3274	IFC	IFCAP server for AAC	Provides fiscal and acquisition support to the AAC and other resident organizations	2005 ESI Survey	Austin, TX - AAC Data Processing Center	x86-based Processors (Intel, AMD)	Windows NT	
3275	IFCAP/ETA	Integrated Fund Control and Electronic Time & Attendance	The applications are under VistA at VHA facilities, but for VACO they are hosted on the Forum system	2005 ESI Survey		Hewlett Packard Alpha	VMS	

## Major Business Application Identification Report

System ID	Short Name	Long Name	System Description	Inventory Source	System Location	System Platform	System OS	Version
3276	IGL-IBM	Insurance General Ledger (on IBM)	The Insurance General Ledger (GL) runs on an IBM server at the Austin Automation Center (AAC). This is a financial record-keeping system that deals primarily with summary-level data and does not make disbursements. It receives inputs from the Insurance Payment System and via on-line data entry from users Philadelphia and VACO. It interfaces with the Department's financial management system (FMS), also housed at the AAC. It also prepares the "Insurance AMIS" reports. A special close-out schedule is done every month and at end of fiscal year.	2005 ESI Survey	Philadelphia VAROIC	IBM 2064-2c5	ZOS version 1.5	
3281	IIV	Insurance Identification and Verification	Electronic data interchange for Veterans Information Systems and Technology Architecture (VISTA) requests for veteran insurance eligibility and return responses from insurance carriers.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	Sun RISC System	UNIX - Other	
3300	IMS	Inventory Management System	Inventory Management System for VA's Veterans Canteen Service (VCS).	2005 ESI Survey	Austin, TX - AAC Data Processing Center	Sun RISC System	UNIX - Other	
3301	IMS?	LOG Procurement History and Cataloging	Collects data based on purchase orders and amendments generated in IFCAP. The data is used for statistical analysis and as a basis for standardization of certain items.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	IBM Mainframe (S/370, S/390)	Z/OS (IBM Mainframe OS-390)	
3309	INP	International Payments	Collects, edits, and summarizes all benefit payments made to payees residing outside the United States on a quarterly basis. Quarterly and fiscal year-to-date reports are printed in VACO.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	NEC (MIPS)	OTHER Unspecified	
3311	INS	Insurance	INS is a large VBA application processed and maintained at the SDC. The AAC INS system has a CICS link to Philadelphia.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	IBM Mainframe (S/370, S/390)	Z/OS (IBM Mainframe OS-390)	
3314	Insurance Self-Service	Insurance Self-Service	The Self-service application makes certain Insurance data available via the Internet. Veterans may access their basic policy information about premiums, dividends, and loan value, or request a mailed copy of their policyholders' statement. The website also has Insurance forms that can be printed and links for e-mail inquiries. (UFN is part of the Insurance Self-Service application).	2005 ESI Survey	Philadelphia VAROIC	Compaq Proliant DL580R2	Windows 2000	
3322	IPAS	International Payment Application System	TBD	2005 ESI Survey		BULL 9000	GCOS8 SR5.2	
3323	IPM	Integrated Property Management System	The application contains the CMR for VACO and allows CMR Officials to update their listing or transfer/surplus equipment. The software also generates summary reports for various indices.	2005 ESI Survey	Silver Springs, MD - VHA IT Field Office	x86-based Processors (Intel, AMD)	Windows 2003	
3324	IPS-IBM	Insurance Payment (IBM) System	The Insurance Payment System runs on the IBM server at the Philadelphia ITC (Information Technology Center, co-located with the VAROIC). This is the master system of records for Insurance policyholders and beneficiaries, although detail and aggregate data may be replicated in other systems.	2005 ESI Survey	Philadelphia VAROIC	IBM zSeries 890	OS/390 version 2.10	

## Major Business Application Identification Report

System ID	Short Name	Long Name	System Description	Inventory Source	System Location	System Platform	System OS	Version
3326	IRR	Ionizing Radiation Registry (IRR)	The Ionizing Radiation Registry (IRR) is a dataset of veterans who may have been exposed to ionizing radiation while on active military duty and have had an IRR examination at a VA medical facility. The voluntary, self-selected nature of the registry makes it valuable for health surveillance; however, it is not designed or intended to be a research tool and therefore, the results cannot be generalized to represent all IR veterans.	2005 ESI Survey		x86-based Processors (Intel, AMD)	Linux	
3347	KLFMENU / FCDM	KLFMenu / Financial Clinical Data Mart	KLFMenu and FCDM provide reporting systems to facilitate data driven decision making within VA.	2005 ESI Survey	OTHER Unspecified	x86-based Processors (Intel, AMD)	Windows 2003	
3352	Krames On Demand	Krames On Demand	v3.0 Provides database of patient educational materials	2005 ESI Survey	OTHER Unspecified	x86-based Processors (Intel, AMD)	Windows 2003	3.0
3353	LAB	Hospital Laboratory	Centralized application of Clinical Laboratory information received from VAMC's laboratory systems on DHCP.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	IBM Mainframe (S/370, S/390)	Z/OS (IBM Mainframe OS-390)	
1159	LACAS	License and Certification Approval Systems	One of the Education Service Applications. A web-based application that maintains information on organizations authorized to pay the cost of licensing and certification tests	2005 ESI Survey, FISMA, 2006 OMB 300		Compaq Proliant DL580R2	Windows 2000	
3358	LBX	Lockbox, First Party	Payment receipt system related to the first party bills mailed by the CCPC system - the Lockbox system will act as the communications hub and identification center for VHA first party debt payments received at a centralized collection center.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	Sun RISC System, IBM Mainframe (S/370, S/390), x86-based Processors (Intel, AMD)	UNIX - Other, Z/OS (IBM Mainframe OS-390), Windows NT	
3361	LFF	Lockbox Funding Fee	LFF is a web based funding fee payment System (FFPS) that allows lender to make their funding fee payment online.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	IBM Mainframe (S/370, S/390)	Z/OS (IBM Mainframe OS-390)	
3362	LGX	Loan Guaranty Index	Online, interactive, centralized database that provides efficient and timely access to basic information about veterans.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	IBM Mainframe (S/370, S/390)	Z/OS (IBM Mainframe OS-390)	
3363	LGY	Loan Guaranty Processing	LGY (initially the Servicemen's Readjustment Act of 1944) covers most veterans who have served since WWII.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	IBM Mainframe (S/370, S/390)	Z/OS (IBM Mainframe OS-390)	
2504	LMIP	National Laboratory Workload and Laboratory Management Index Program	Effective management of Pathology and Laboratory Medicine Service (P&LMS) laboratories requires indicators capable of demonstrating each individual laboratory's productivity and efficiency. Local sites require the capability to determine in real time, the effects of any procedural or policy changes relating to productivity and efficiency.	2005 ESI Survey		MAINFRAME	z900	

## Major Business Application Identification Report

System ID	Short Name	Long Name	System Description	Inventory Source	System Location	System Platform	System OS	Version
2503	Lockbox	Lockbox, First Party	Lockbox provides improved first-party medical debt payment processing. The Lockbox system is designed to handle only first-party medical debt payments. First-party medical debt is defined as a debt where the patient is responsible for the payment. This differs from third-party debt where a third party (e.g., insurance company, health maintenance organization) is primarily responsible for paying the VA. Lockbox is the second phase of the Consolidated Co-payment Processing Center (CCPC) initiative.	2005 ESI Survey		Sun RISC System	UNIX - Other	
3366	LOG	Logistics	Logistics supports the storage, ordering, and distribution of forms and publications and various other items stocked at the Service Distribution Center (SDC).	2005 ESI Survey	Austin, TX - AAC Data Processing Center	IBM Mainframe (S/370, S/390)	Z/OS (IBM Mainframe OS-390)	
3368	LOP	Local Payroll (for ORM)	Veterans Health Information Systems and Technology Architecture (VISTA) technical Support to FSC's Support of Office of Resource Management (ORM) payroll.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	IBM Mainframe (S/370, S/390)	Z/OS (IBM Mainframe OS-390)	
3369	LPS	VHA Learner's Perception Survey	The Veterans Health Administration of the Department of Veterans Affairs initiated the Learners' Perceptions Survey to provide ongoing data and information to support the performance measure for VA's teaching mission. The outcome of the performance measure is to promote excellence and innovation in the education of health care professionals on a continual basis.	2005 ESI Survey	OAA Academic Information Management Center	x86-based Processors (Intel, AMD)	Windows 2003	
3370	LRA	Loan Guaranty Rapid Access	Online, interactive, distributed processing and database network that includes database files for LCS and PMS. The LGY Rapid Access system is available each workday from 7 a.m. to 6 p.m. for inquiry.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	IBM Mainframe (S/370, S/390)	Z/OS (IBM Mainframe OS-390)	
3371	LS&C	Loan Service and Claims	Automates the claims process of liquidation and claims processing, and provides a financial management tool to the regional offices.	2005 ESI Survey		E10K SUN	Solaris 9.0	
3372	LSC	Loan Service and Claims	Maintains the operational control, servicing and reporting of defaults, claims, and liquidation of GI loan accounts throughout the United States and Puerto Rico.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	IBM Mainframe (S/370, S/390), Sun RISC System	Z/OS (IBM Mainframe OS-390), UNIX - Other	
3387	MCCR NDB	Medical Care Cost Recovery National Database (MCCR)	The Medical Care Cost Recovery National Database (MCCR NDB) provides a repository of summary MCCR billing and collection information used by program management to compare facility performance. It stores summary information for VHA receivables including the number of receivables and their summarized status information. This database is used to monitor the status of the VHA's collection process and to provide visibility on the types of bills and collections being done by the Department. The mission of the VA MCCR Program is to maximize the recovery of funds due VA for the provision of health care services to veterans, dependents, and others using the VA system.	2005 ESI Survey		DEC ALPHA	VMS	

## Major Business Application Identification Report

System ID	Short Name	Long Name	System Description	Inventory Source	System Location	System Platform	System OS	Version
3388	MCI	Master Case Index - OIG Enterprise Database	OIG maintains and controls an enterprise database system known as the Master Case Index (MCI). This is the primary information system supporting OIG's case management and decision making. This system supports about 400 users in about 25 locations. The system is developed, maintained and controlled by VA OIG personnel. The current MCI application is based on client/server architecture with the database residing on a server running Oracle 10g. This server is a Dell 6400 with dual processors running the Windows 2000 Server operating system. DUE TO PUBLIC LAW REQUIRING OIG INDEPENDENCE THIS SYSTEM OPERATES UNDER THE DIRECTION AND CONTROL OF THE INSPECTOR GENERAL.	2005 ESI Survey	OTHER Unspecified	x86-based Processors (Intel, AMD)	Windows 2000	
1172	MCTSI	Military to Civillian Transferable Skills Identifier	Provides vocational counselors with current information about the various military occupations and their relationships to civilian occupations.	2005 ESI Survey, FISMA, EA 2.1	PHILLY ITC	Compaq Proliant DL580R2	Windows 2000	
3395	MDE	M Data Extractor	MDE extracts data from Vista to SQL tables for Strategic Reporting Systems.	2005 ESI Survey		x86-based Processors (Intel, AMD)	Windows 2003	
3397	MDP	Medical SAS File (Medical District Planning (MDP))	The Medical SAS system provides a variety of SAS-formatted files containing medical data for use by remote users and AAC personnel in order to produce customized reports to fulfill specific reporting needs. These files produce a variety of statistical information for the VA community to assist medical center, regional, and central office personnel in reporting VA workload and patient care information.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	IBM Mainframe (S/370, S/390)	Z/OS (IBM Mainframe OS-390)	
3400	MDS	Minimum Data Set	A database oriented system that provides storage, access and analysis of long-term care data on patients in VA facilities. Also called Minimum Data Set/Resident Assessment Instrument (MDS/RAI).	2005 ESI Survey	Austin, TX - AAC Data Processing Center	Sun RISC System	UNIX - Other	
3424	MHA	Mental Health Assistant	Class I VistA application enabling patients to take psychological tests online.	2005 ESI Survey	OTHER Unspecified	x86-based Processors (Intel, AMD)	OTHER Unspecified	1.03.10
3425	MHV	MyHealtheVet	MHV is a public facing web portal that allows VA patients to track self-entered health metrics, refill VA prescriptions, access health education and obtain information on available VA benefits.	2005 ESI Survey	Silver Springs, MD - VHA IT Field Office	Sun RISC System	Solaris	

## Major Business Application Identification Report

System ID	Short Name	Long Name	System Description	Inventory Source	System Location	System Platform	System OS	Version
3447	MPCR	Monthly Program Cost Report (MPCR)	The Monthly Program Cost Report (MPCR) replaces the Cost Distribution Report (CDR) in providing summary information about Veterans Affairs costs, Full Time Equivalents (FTE), and workload (number of patient bed days, outpatient clinic stops, etc.). These two reports are available to users via RSD and CD ROM. The primary users of CDR are the VAMCs, Veterans Health Administration Budget Office, Medical Care Cost Recovery, and Deputy Assistant Secretary for Budget. Allows users to compare facility and medical center per unit cost to nationwide per unit cost.	2005 ESI Survey		MAINFRAME	z900	
3449	MPI	Master Patient Index	The Master Patient Index (MPI) database is the primary vehicle for assigning and maintaining unique patient identifiers. A gateway in VISTA establishes connectivity between VAMC systems and patient registration processes and links to the MPI for message processing and patient identification. The Master Patient Index (MPI) has been created to support maintenance of a unique patient identifier and a single master index of all VA patients and to allow messaging of patient information among the institutional partners [i.e., VHA, Veterans Benefits Administration (VBA), Board of Veterans Appeals (BVA), and National Cemetery Service (NCS)].	2005 ESI Survey	Austin, TX - AAC Data Processing Center	Sun RISC System	UNIX - Other	
3450	MPR	Military Personnel Registry	The Missing Patient Registry (MPR) system is a web-based system designed to assist medical center personnel in tracking and locating patients reported as missing. Missing Patient Administrators do the entry of missing and patients into the Missing Patient Registry at the facilities. A nightly batch job checks to see if the missing patients have been seen at another VHA facility. If the missing patient has been located at another facility an e-mail is sent out notifying the facility that reported the patient missing. Provides a listing of patients reported as missing by a VA medical facilities. Allows tracking and reporting of missing patient information from each VA site for distribution to all facilities.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	Sun RISC System, IBM Mainframe (S/370, S/390), x86-based Processors (Intel, AMD)	Z/OS (IBM Mainframe OS-390), UNIX - Other, Windows NT	
3453	MRS	Medical Registry System	Facilitates access to medical records retired from military medical treatment facilities.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	x86-based Processors (Intel, AMD), Sun RISC System, IBM Mainframe (S/370, S/390)	UNIX - Other, Windows NT, Z/OS (IBM Mainframe OS-390)	
4204	MUM	Medora Utilization Management	Application developed by Ann Arbor, used by all VISA 11 sites for performing daily bed utilization reviews of inpatients, soon to include outpatient reviews, pre-cert reviews, appeal reviews of inpatient stays, diversions.	2005 ESI Survey	OTHER Unspecified	x86-based Processors (Intel, AMD)	Windows 2003

System ID	Short Name	Long Name	System Description	Inventory Source	System Location	System Platform	System OS	Version
3483	Mumps Audiofax	Mumps Audiofax	Pharmacy phone call prescription renewal.	2005 ESI Survey		x86-based Processors (Intel, AMD)	Windows NT	
3485	MUSE	MUSE	EKG data tracking system. Monitors EKGs for Veterans throughout the region. One system located at Providence VA with remote upload unit at each VISN facility	2005 ESI Survey		Hewlett Packard RISC System	Windows NT	
3500	MVR	Master Veteran Record	A logical record dynamically created from a collection of interconnected databases that contain data of interest across multiple VA components. Provides critical data elements from VBA regarding current eligibility information.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	IBM Mainframe (S/370, S/390), Sun RISC System, x86-based Processors (Intel, AMD)	UNIX - Other, Windows NT, Z/OS (IBM Mainframe OS-390)	
3501	NACIPRT	National Agency Check and Inquiry	The application tracks the progress of background investigations of new employees.	2005 ESI Survey	OTHER Unspecified	x86-based Processors (Intel, AMD)	Windows 2003	
3514	NED	National Enrollment Database	The National Enrollment Database (NED) resulted from the Eligibility Reform Act of 1996 that mandated the provision of VA health care services through an annual patient enrollment system. NED and the associated National Enrollment Data Mart (NEDM) were established to meet specific reporting requirements. NED serves as the single primary source for storing enrollment records at a national level and is populated on a nightly basis from enrollment and eligibility data residing at the Health Eligibility Center (HEC).	2005 ESI Survey		DEC ALPHA	UNIX - Other	
3526	NFP	National Finance Center Print	A set of biweekly reports generated primarily from the National Finance Center (NFC) based Mission and Assignment Tracking System (MATS).	2005 ESI Survey	Austin, TX - AAC Data Processing Center	IBM Mainframe (S/370, S/390)	Z/OS (IBM Mainframe OS-390)	
3529	NHCPD	National Health Care Practitioner Database (NHCPD)	This database is part of the National Medical Information System (NMIS). The National Health Care Practitioner Database supports VHA Privacy Act requirements by segregating personal information about health care practitioners such as name and SSN from patient information recorded in NPCD for Ambulatory Care Reporting and Primary Care Management Module. The structure is based on the proposed National Provider Identifier system being created by the Centers for Medicare & Medicaid Services to support HIPAA. The NHCPD retains a history of names, employing VAMCs, and provider types for practitioners.	2005 ESI Survey		x86-based Processors (Intel, AMD)	z900	
3530	NIF	National Item File	Creates national standards so supplies to be consistently tracked, provides basis to ID local level requirements for standardization and national contracts opportunities, and accelerates tracking and expansion of NIF efforts using Web technology.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	Sun RISC System	UNIX - Other	

## Major Business Application Identification Report

System ID	Short Name	Long Name	System Description	Inventory Source	System Location	System Platform	System OS	Version
3532	NMHDS	National Mental Health Database System (NMHDS)	The National Mental Health Database System (NMHDS) records and stores information about veterans treated for Post Traumatic Stress Disorder (PTSD) by the over 100 Specialized Outpatient PTSD Programs at local VAMCs in the Veterans Health Administration (VHA).	2005 ESI Survey		x86-based Processors (Intel, AMD)	UNIX - Other	
3548	NPC	National Patient Care Database	Collects and stores clinical and administrative data received from VHA's Veterans Integrated Systems Technology Architecture (VISTA) software. With NPC, VA collects and stores encounter and provider info for VHA management.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	IBM Mainframe (S/370, S/390), Sun RISC System, x86-based Processors (Intel, AMD)	UNIX - Other, Windows NT, Z/OS (IBM Mainframe OS-390)	
3549	NPCD	National Patient Care Database (NPCD)	This database is part of the National Medical Information System (NMIS). The National Patient Care Database (NPCD) resulted from a data-modeling project sponsored by the Medical Information Resource Management Office (MIRMO) (now the Office of Information) during Fiscal Year 1995. A VA workgroup supported by a contractor analyzed four VHA corporate systems that collect patient care data. NPCD now contains data collected from five former VHA corporate systems patient care databases.	2005 ESI Survey		x86-based Processors (Intel, AMD)	UNIX - Other	
3550	NPM	National Patch Module (NPM)	The National Patch Module (NPM) software provides a database for the distribution of software patches and updates to VistA.	2005 ESI Survey		DEC ALPHA	VMS	
3551	NPPD	National Prosthetic Patient Database (Prosthetic and Sensory Aids Service Strategic Healthcare Group)	The National Prosthetics Patient Database (NPPD) established a central database of Prosthetics data recorded at each VHA facility.	2005 ESI Survey		x86-based Processors (Intel, AMD)	Windows NT	
3552	NR5	National Archives Registry System	Maintains the NARS system and provides the location of government records sent to the National Archives and Records Administration by government agencies for archival purposes. It is used to locate, retrieve, and dispose of these records.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	IBM Mainframe (S/370, S/390), Sun RISC System, x86-based Processors (Intel, AMD)	UNIX - Other, Windows NT, Z/OS (IBM Mainframe OS-390)	
3555	NSV	National Survey of Veterans	The National Survey of Veterans (NSV) is a survey aimed at delineating the characteristics of the veteran population at a single point in time. The information collected in this survey allows the VA to follow trends in the veteran population, compare veterans who use VA programs to those who do not, and provides a current resource of data for policy analyses and program planning.	2005 ESI Survey		MAINFRAME	z900	
3558	NTX VistA	North Texas HCS VistA	Provides VistA for all sites in NTX.	2005 ESI Survey		Digital Equipment (VAX)	OTHER Unspecified	

## Major Business Application Identification Report

System ID	Short Name	Long Name	System Description	Inventory Source	System Location	System Platform	System OS	Version
3561	Nursing Procedures	Nursing Procedures	Nursing procedures reference and edited procedures storage system.	2005 ESI Survey		x86-based Processors (Intel, AMD)	Windows 2003	
3565	NVH	Non-VA Hospital System	The VHA pays for care provided to VA beneficiaries in non-VA hospitals through its contract hospitalization program as mandated by Congress in the late 1980s. The NVH software captures the patient's Demographics, Provider, Hospital Name and Location, Medicare Provider Number, Diagnoses and Procedures for which the patient received care during his/her inpatient stay..	2005 ESI Survey	Austin, TX - AAC Data Processing Center	IBM Mainframe (S/370, S/390)	Z/OS (IBM Mainframe OS-390)	
3566	OAA-Ops	OAA Operational Support Application	This system supports the internal business operations of the Office of Academic Affiliations. It monitors and tracks fiscal and health services training positions for VA's Academic Mission; it monitors and tracks funding and allocation of medical resident positions; it monitors funding and allocation of allied health professions positions and it monitors the applications and appointments of VA Medical and Post-Doctoral Fellowships.	2005 ESI Survey	OAA Academic Information Management Center	x86-based Processors (Intel, AMD)	Windows 2003	
3567	OAA-SC	Office of Academic Affiliations Support and Data Center	This system is an intranet web site that collects data from VA Medical Centers in support of VA's Academic mission. It is currently comprised of six Database Applications that allow field based personnel to enter data and print reports related to Health Services, Graduate Medical and Post Doctoral Fellowship training, internships and residencies. Information on the status of VA's residency training programs is also collected and maintained.	2005 ESI Survey	OAA Academic Information Management Center	x86-based Processors (Intel, AMD)	Windows 2003	
3589	OLAF	On-Line Approval File	Automates record keeping for approvals of institutions of higher learning, non-college degree programs, and other training facilities for VBA.	2005 ESI Survey	Austin, TX - AAC Service Delivery Center	Compaq Proliant DL580R2	Windows 2000	
3590	OLDE	PAID Online Data Entry (see PAD)	Customer interface for entering data into the PAID System. See PAD.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	IBM Mainframe (S/370, S/390)	Z/OS (IBM Mainframe OS-390)	
1179	OMCS	Order Management Control Software	OMCS is proprietary software (that resides on a SCO UNIX OPERATING SYSTEM) that interfaces with Pharmaceutical Dispensing Machines to automate the filling of patient prescriptions at VA Consolidated Mail Outpatient Pharmacy (CMOP).	2005 ESI Survey, FISMA, IT Procurement Tracking System			UNIX - Other	
3610	OQP Internet Site	OQP Clinical Practice Guidelines Internet site	Internet site to disseminate CPGs and take surveys.	2005 ESI Survey	OTHER Unspecified	x86-based Processors (Intel, AMD)	Windows 2003	
3611	OQP Intranet Website	vaww.oqp.med.va.gov	Intranet website for OQP products and services, also conducts surveys.	2005 ESI Survey		x86-based Processors (Intel, AMD)	Windows 2003	
3615	ORMWBT	ORM Web Based Tracking	The Complaint Tracking System follows cases through both the informal and formal phases of the investigation providing the current disposition. The system also generates monthly and quarterly progress/workload reports.	2005 ESI Survey	OTHER Unspecified	x86-based Processors (Intel, AMD)	Windows 2003	

## Major Business Application Identification Report

System ID	Short Name	Long Name	System Description	Inventory Source	System Location	System Platform	System OS	Version
3617	OTM	Optivity Telephony Management	Telephone Management System	2005 ESI Survey	Nortel	Dell Server	Windows NT	
3621	PACS	Radiology: PACS (MPLS)	Commercial Radiology Imaging System	2005 ESI Survey	BRIT	IBM P630	AIX 5.1 Maintenance Level 7	
3622	PACS	AGFA Impax	Picture Archiving and Communications System	2005 ESI Survey		Sun RISC System	Solaris	4.1 SP 4
3650	PAD	PAID	The VA e-Payroll project involves development of multiple interfaces between the AAC and DFAS, and extensive changes within VA's current PAID application and VHA's T&A application, to interface with the Defense Civilian Pay System (DCPS).	2005 ESI Survey	Austin, TX - AAC Data Processing Center	IBM Mainframe (S/370, S/390)	Z/OS (IBM Mainframe OS-390)	
3623	PAD	Personnel and Accounting Integrated Data (PAID) System	Department of Veterans Affairs (VA's) automated payroll system and serves as the central system for support of human resources and payroll functions.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	IBM Mainframe (S/370, S/390)	Z/OS (IBM Mainframe OS-390)	
3626	PAF	Patient Assessment File	The Patient Assessment File (PAF) database compiles the results of the Patient Assessment Instrument (PAI) questionnaire filled out for intermediate care VHA patients. The PAI is filled out within two weeks of admission. It is also completed semi-annually on April 1 and October 1 for each patient by a registered nurse familiar with the patient. The PAI questions cover medical treatments, conditions, selected diagnoses, activities of daily living, behaviors, some rehabilitation therapies, and chronic respiratory support.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	IBM Mainframe (S/370, S/390)	Z/OS (IBM Mainframe OS-390)	
1181	PAID	Personnel and Accounting Integrated Data	PAID is VA's 39-year-old legacy payroll and payroll human resources system.	2005 ESI Survey, FISMA, 2006 OMB 300	Austin, TX - AAC Data Processing Center	IBM Mainframe (S/370, S/390)	OS/400 (IBM AS-400)	
3631	PAT	Patrol Open Systems Monitoring	Monitoring tool on selected Open Systems servers and provides automated monitoring information with built-in historical database. Data collected used for Performance and Capacity Planning analysis, and as real-time monitoring and alert functionality.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	x86-based Processors (Intel, AMD)	Windows NT	
3642	PCGL	PC Generated Letters	Provides letter generation capabilities to Veterans Service Center (C&P, Edu), LGY Loan Guaranty, and ORM (Office of Resource Management - new) using PCs and accessing BDN data	2005 ESI Survey		Compaq Proliant DL580R2	Windows 2000	
3645	PCR	Program Cost Reporting	Monthly report provides VHA management with information on full time equivalents (FTE), personal services, and other costs. MPCR offers capability to compare facility costs to nationwide per-unit costs.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	IBM Mainframe (S/370, S/390)	Z/OS (IBM Mainframe OS-390)	
3647	PDD	PAID Development	Accounts for work supporting implementation of PAID software enhancements deferred for discontinued HR LINK\$ takeover.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	IBM Mainframe (S/370, S/390)	Z/OS (IBM Mainframe OS-390)	
3651	Performance Data Warehouse	Performance Data Warehouse	Performance data warehouse providing performance measures	2005 ESI Survey		x86-based Processors (Intel, AMD)	Windows 2003	

## Major Business Application Identification Report

System ID	Short Name	Long Name	System Description	Inventory Source	System Location	System Platform	System OS	Version
3652	Performax	Performax	Training and Education database.	2005 ESI Survey		x86-based Processors (Intel, AMD)	Windows 2003	
3659	PFP	Pay For Performance	GAO front-end system generates a dataset for a PC-based application used by GAO in support of annual merit salary increases. Sends merit increase transactions to the payroll/personnel system at the National Finance Center (NFC) once a year.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	IBM Mainframe (S/370, S/390)	Z/OS (IBM Mainframe OS-390)

3636	PHF	Payment History File	An automated Payment History File allows the retrieval of payment and returned payment information for all the benefit systems that are paid through the BDN and VetsNet. This information is accessible using Target System terminals for on-line inquiry from all regional offices via the Treasury Inquiry (TINQ) command. Payment History data is also available for inquiry via the TINQ command in the SHARE system.	2005 ESI Survey		BULL 9000	GCOS8 SR5.2	
3665	PHR	Pharmacy Insurance Claims	Automates submission of prescription claims using the HIPAA-mandated National Council of Prescription Drug Program (NCPDP), Telecommunication Standard 5.1. Vitria.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	Sun RISC System	UNIX - Other	
1187	PIES	Personnel Information Exchange System	A client/server application designed to improve the quality and timeliness of requesting veteran information from outside agencies. Information gained from these requests is used to process claims for pension, pension, education, burial and loans.	2005 ESI Survey, FISMA, IT Procurement Tracking System, EA 2.1		Sun RISC System	Solaris 9.0	
3669	PIR	Patient Index Registry System	Maintains Patient Index Registry System records and provides the physical location of medical folders for separated patients. The folders are kept at the National Civilian Personnel Record Center.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	IBM Mainframe (S/370, S/390)	Z/OS (IBM Mainframe OS-390)	
3673	PLN	Program for Locality Adjustments for Nurses	PLN is a software program designed to assist human resource offices in developing pay schedules for the Nurse Locality Pay System. It is used to develop pay schedules for RNs and CRNAs.	2005 ESI Survey	Austin, TX - AAC Service Delivery Center	x86-based Processors (Intel, AMD)	Windows 2003	
3674	PMC	Presidential Memorial Certificate	Initiates requests on a family's behalf and prints the Presidential Memorial Certificates that express, from the President, the nation's gratitude for a veteran's honorable service to the next of kin and other family members of deceased veterans.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	IBM Mainframe (S/370, S/390)	Z/OS (IBM Mainframe OS-390)	
3675	PMR	Payroll Management Report for GAO	The GAO Payroll/Personnel Management Reporting System (PPMRS) is a set of periodic reports written in SAS that are generated from a biweekly interface of personnel data provided by the GAO National Finance Center (GAO-NFC).	2005 ESI Survey	Austin, TX - AAC Data Processing Center	IBM Mainframe (S/370, S/390)	Z/OS (IBM Mainframe OS-390)	

## Major Business Application Identification Report

System ID	Short Name	Long Name	System Description	Inventory Source	System Location	System Platform	System OS	Version
1189	PMS	Property Management Systems	Centralized automated data processing system for the operational control of individual cases in the inventory of VA acquired properties. It contains records on properties acquired in conjunction with the provisions of the VA Loan Guaranty program and as a result of loan terminations in the VA portfolio of loans.	2005 ESI Survey, FISMA, EA 2.1		IBM 2064-2c5	ZOS version 1.5	
3676	PMS	Property Management System	The Property Management System is responsible for the maintenance and sale of all VA properties.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	NEC (MIPS)	OTHER Unspecified	
3677	POLLY	VACO Position Classification Tracking	VACO Position Classification Tracking	2005 ESI Survey	OTHER Unspecified	x86-based Processors (Intel, AMD)	Windows 2003	
3679	POM	Purchase Order Management System	Manages the VCS (Veterans' Canteen Service) inventory for 170 sites across the United States and Puerto Rico. VCS provides quality retail items, food, and services at reasonable prices to patients, caregivers, and visitors of VAMCs.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	x86-based Processors (Intel, AMD), Sun RISC System	UNIX - Other, Windows NT	
3680	POW	Prisoner of War	As part of Ex-Prisoner of War Medical Evaluation Program, provides a complete medical and psychiatric evaluation for Ex-POWs. System evaluates effectiveness of this program and provides information on health care provided and compensation received.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	Sun RISC System	UNIX - Other	
1193	POWDB	Prisoner of War Database	POW tracks the level of service received by former POWs from the VA. Code sheets are converted to e-input and process via COBOL programs to edit input, update the POW master file create a listing of valid transactions/POW master records.	2005 ESI Survey, FISMA, EA 2.1		BULL 9000	GCOS8 SR5.2	
3701	Proc 2.2	Procedures 2.2	Integrated electronic system resource designed to ensure staff competency in performing nursing procedures. Enables electronic tracking of staff competencies.	2005 ESI Survey	OTHER Unspecified	Server with 8 Virtual Servers	Windows 2003 Servers with IIS	
3702	Procedures	Procedures	Nursing Procedure DB	2005 ESI Survey		x86-based Processors (Intel, AMD)	Windows 2003	2.2
3708	Proclarity Analytics Server	Proclarity Analytics Server	Used by the corporate database to analyze corporate data and provide analysis in report, chart, and table format.	2005 ESI Survey		x86-based Processors (Intel, AMD)	Windows 2003	
3709	Proclarity Server	Proclarity Applications Server	Data Cube manipulation software for data analysis.	2005 ESI Survey	OTHER Unspecified	x86-based Processors (Intel, AMD)	Windows 2003	6.0
3729	PTF	Patient Treatment File (PTF)	This database is part of the National Medical Information System (NMIS). The Patient Treatment File (PTF) contains a statistical record for each inpatient care episode provided under VA auspices in VA and non-VA facilities nationwide.	2005 ESI Survey		MAINFRAME	z900	
1200	QSR	Quarterly Statistical Report	Provides statistical data on various workload indices for each quarter of the FY & an annual report, from each VR&E Division. Data is collected & a report is sent to each Division at the end of each quarter of the FY & an annual report at the end of FY.	2005 ESI Survey, FISMA, IT Procurement Tracking System, EA 2.1	PHILLY ITC	Compaq Proliant DI380	Windows 2000	

## Major Business Application Identification Report

System ID	Short Name	Long Name	System Description	Inventory Source	System Location	System Platform	System OS	Version
3779	RAI/MDS	Resident Assessment Instrument/Minimum Data Set	The Resident Assessment Instrument / Minimum Data Set (RAI/MDS) is a comprehensive assessment and care planning process used by the nursing home industry since 1990 as a requirement for nursing home participation in the Medicare and Medicaid programs. The RAI/MDS provides data for monitoring changes in patient status that are consistent and reliable over time.	2005 ESI Survey		x86-based Processors (Intel, AMD)	Windows NT	
3795	RalsG/Rals-Plus	RalsG/Rals-Plus	RALS-Plus is a fully integrated data management information system (IS) for hospitals using a variety of supported point of care (POC) test devices from different device manufacturers. The primary device being connected with RALS-Plus within the VA hospitals is the Roche Accu-Check Inform glucose meter. RALS-Plus receives test results from the POC devices transmitted via the hospital data network, and stores the results in its database residing in the RALS Core System. Patient test results may then be transferred automatically from RALS-Plus to VistA for inclusion on the patient's electronic record	2005 ESI Survey	OTHER Unspecified	x86-based Processors (Intel, AMD)	Windows 2003	
3800	RDIS	Research and Development Information System	Research and Development Information System (RDIS) is the data collected from VAMCs on all VA research projects. It includes project data, funding data, and investigator data from VAMCs. RDIS is also the system of budgetary and project information kept and used by Veterans Affairs Central Office (VACO) personnel to manage the research program.	2005 ESI Survey		x86-based Processors (Intel, AMD)	Windows NT	
3802	RECERT	Recertification	Processes Treasury returned payment data and sends return payment data transactions to all BDN payment systems.	2005 ESI Survey		BULL 9000	GCOS8 SR5.2	
1205	REPS	Reinstated Entitlement Program for Survivors	Reinstated Entitlement This program Legislation was originally passed as an amendment to public Law Program for Survivors 97-377 for the sole purpose of restoring Social Security Administration benefits to surviving spouses and/or school children of members or former members of the armed forces who died while on active duty before August 13, 1981, or whose death after discharge was the result of a disability incurred or aggravated by military service before that date. The restored benefits are funded by the Department of Defense and administered by the VA. The REPS database is updated on a weekly basis by daily on-line transactions originating at the St. Louis Regional Office.	2005 ESI Survey, FISMA		BULL 9000	GCOS8 SR5.2	
3808	ResQRN	ResQRN	Provides scheduling management for Nursing staff.	2005 ESI Survey		x86-based Processors (Intel, AMD)	Windows 2003	
3810	RHC	Residential Home Care	Supports administration of care of veterans in private residences or other privately operated care facilities. Quarterly reports describe the home care facility in categories such as number of beds, average length of stay, and average rate paid.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	IBM Mainframe (S/370, S/390)	Z/OS (IBM Mainframe OS-390)	

## Major Business Application Identification Report

System ID	Short Name	Long Name	System Description	Inventory Source	System Location	System Platform	System OS	Version
3812	RightNow Web	RightNow Web	RightNow Web is an Internet based application that provides Education Benefit self-service inquiry processing. It provides customers with a searchable, self learning database of Frequently Asked Questions. It also allows a customer to submit an inquiry directly to the Customer Service section at a Regional Processing Office (RPO). The inquiries are routed to the proper RPO Group based on where the customer lives. Customer Service personnel then respond to the questions and the customer receives an e-mail advising that the inquiry is solved and a link back to the site to view the answer. ALL inquiries and answers are handled in a secure environment (SSL).	2005 ESI Survey		Compaq Proliant DL580R2	Windows 2000	
3813	RIO	RIO	Research Inventory System	2005 ESI Survey		x86-based Processors (Intel, AMD)	Windows 2003	1
3815	RLS	Records Locator System (BIRLS)	Primary veteran record database application used to process online inquiry and update transactions to provide VA customers with verified veteran data.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	IBM Mainframe (S/370, S/390)	Z/OS (IBM Mainframe OS-390)	
3818	RMS	Records Management Support	Technical support including record retrieval and storage, static Web page design to describe vault activities, etc.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	x86-based Processors (Intel, AMD)	Windows NT	
1209	RSD	Rogers Software Development	Provides automation support to assist Regional Office personnel in retrieving data messages and reports generated at the Austin Automation Center (AAC).	2005 ESI Survey, FISMA, EA 2.1		Sun RISC System		
3839	SAS	SAS	Data Warehousing Application used by Directors Office	2005 ESI Survey		x86-based Processors (Intel, AMD)	Windows 2003	9.3.1
1218	SBRS	State Benefit Reference System	A system of references for all the veterans' benefits programs in each state. In addition to describing benefits and eligibility criteria, the references provide instructions for VSRs to follow in issuing certifications to veterans regarding information in VA records. Information is also provided on VA facilities, as well as certain state and local resources. The system is expected to be converted to HTML with javascript functionalities and moved to the Intranet.	2005 ESI Survey, FISMA, EA 2.1	Jackson, MS	x86-based Processors (Intel, AMD)	Windows 2000	
3842	SCCS	Symposium Call Center	Telephone Call Center Application	2005 ESI Survey	Nortel	Dell Server	Windows NT	
3843	SCD	Spinal Cord Dysfunction	The Spinal Cord Dysfunction (SCD) module supports the maintenance of local and national registries for the tracking of patients with spinal cord injury and disease from both traumatic and non-traumatic causes. SCD includes features for clinical, management, and research staff. Clinicians benefit from the ability to see profiles of SCD patients, ensure that regular annual exams are completed, and measure patient outcomes. Managers have a suite of reports that reflect the resources needed to care for SCD patients. Researchers have access to a national registry for all veteran SCD patients and their associated health care events.	2005 ESI Survey		DEC ALPHA	UNIX - Other	

## Major Business Application Identification Report

System ID	Short Name	Long Name	System Description	Inventory Source	System Location	System Platform	System OS	Version
3845	ScriptPro	ScriptPro	Outpatient Pharmacy Automation for Prescriptions	2005 ESI Survey	ScriptPro	x86-based Processors (Intel, AMD)	Windows 2003	7.12.05
3863	SharePoint	SharePoint Services	Enterprise information portal. Provides interactive access to shared information, documents, and calendars. Provides an enterprise search capability.	2005 ESI Survey		x86-based Processors (Intel, AMD)	Windows 2003	
3874	SIS	Space Information System	An NR5-related system that provides the National Archives and Records Administration with warehouse space availability information. (See NR5).	2005 ESI Survey	Austin, TX - AAC Data Processing Center	IBM Mainframe (S/370, S/390)	Z/OS (IBM Mainframe OS-390)	
1213	SMRTS	Service Medical Records Tracking System	Provides tracking system for medical records from service area.	2005 ESI Survey, FISMA, EA 2.1		x86-based Processors (Intel, AMD)		
3876	SMRW	Web Application (Service Medical Record)	Under a Memorandum of Understanding with the Department of Defense (DoD), VA is required to "...return records associated with a DoD mobilization to sites determined by DoD within 72 hours of notification that a service member/veteran will be recalled to active duty." Using Web SMR, the Defense Manpower Data Center (DMDC), via its website, will request from VBA, SMRs for recall. VBA will download the file from its website; search the Beneficiary Identification and Record Locator Subsystem (BIRLS) for the location of the SMRs; connect to the Web SMR SQL server database to update the appropriate table(s); and notify the appropriate regional office (or VA's Records Management Center (RMC), if applicable) via e-mail to process the request. The regional offices (or RMC) will then use the Web SMR application to view pending requests, mail the folders to appropriate addresses, and update the request with tracking information (e.g., FEDEX information, number of volumes sent, etc).	2005 ESI Survey		Compaq Proliant DL580R2	Windows 2000	
3878	SMS	System Management System 2003	The SMS system is used to support configuration management and assists sites in VHA with deployment of packages, updates and fixes to windows based workstations and servers.	2005 ESI Survey	Hines, IL - VHA IT Field Office	x86-based Processors (Intel, AMD)	Windows 2003	2003
3898	SPOT	SPOT	Used by site patient-safety specialists to track and report on patient safety issues.	2005 ESI Survey	National Patient Safety Office	x86-based Processors (Intel, AMD)	Windows 2003	
2516	SRA DB	Surgery Risk Assessment Database	The Surgery Risk Assessment (SRA) database is part of the National Surgical Quality Improvement Program (NSQIP). This database contains assessments of selected surgical operations performed at Veteran Affairs Medical Centers (VAMCs). Provides annual reports evaluating VAMCs surgical performance. Provides information for trend analysis by the NSQIP Executive Committee for VAMC's Chiefs of Surgery. Provides historical risk assessment information to help researchers improve the quality of surgical procedures.	2005 ESI Survey			VMS	

## Major Business Application Identification Report

System ID	Short Name	Long Name	System Description	Inventory Source	System Location	System Platform	System OS	Version
3910	SRP	Scheduling Replacement Project	An Enterprise-level outpatient Scheduling application that incorporates business process re-engineering of patient appointment activities.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	x86-based Processors (Intel, AMD)	Windows NT	
3911	ST	Suggestion Tracking	The application tracks suggestions and awards for employees meeting the requirements.	2005 ESI Survey	OTHER Unspecified	x86-based Processors (Intel, AMD)	Windows 2003	
1219	STAR	Statistical Technical Accuracy Review	Used to record both local (Regional Office) and National (C&P Service) accuracy reviews of rating, authorization, and fiduciary.	2005 ESI Survey, FISMA, EA 2.1		Compaq Proliant DL580R2	Windows 2000	
3940	Synquest	Synquest Healthcare Education System	From Healthstream, Inc. Healthcare education for VA Ann Arbor employees.	2005 ESI Survey		x86-based Processors (Intel, AMD)	Windows 2003	
3949	TAS	Time and Attendance System for GAO	Combines the time and attendance transactions from all GAO organizations into a common file.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	x86-based Processors (Intel, AMD)	Windows NT	
3966	TEM	TeamPlay	Provides project management and job cost accounting information in support of ongoing business operations of the AAC. Supports all divisions of the AAC.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	x86-based Processors (Intel, AMD)	Windows NT	
3985	TheraDoc	TheraDoc	TheraDoc's software augments clinical decision-making by providing health care professionals with knowledge-enriched, disease-specific recommendations for treatments, tests and referrals based on individual patient profiles. The software integrates individual electronic patient records (EPR) with coded clinical data, global medical knowledge and institutional protocols. TheraDoc's technology provides the power to reason and make clinical inferences across the patient record, using data from multiple sources within an institution's existing information systems.	2005 ESI Survey	OTHER Unspecified	x86-based Processors (Intel, AMD)	Windows 2003	
3988	TIMS	The Image Management System	A Microsoft Windows-based client/server application which runs in VBA's environment. This application currently uses imaging and workflow technology in the processing of all educational benefits. This application is currently in production at the Atlanta Muskogee, St. Louis and Buffalo Regional Processing Offices (RPOs). TIMS is now operating in a 32-bit application running in Windows 95.	2005 ESI Survey	HINES ITC	E3500 SUN	Solaris 9.0	
3993	TOP	Treasury Offset Program	Program to collect VA debts through Treasury offset. It is a Federally mandated debt referral program. Federal agencies must refer debts greater than 180 days old to Treasury for offset by Federal benefits.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	IBM Mainframe (S/370, S/390)	Z/OS (IBM Mainframe OS-390)	
4004	TSK	Task Tracking System	An NRS5-related system that provides the National Archives and Records Administration with the ability to track workload.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	Sun RISC System, IBM Mainframe (S/370, S/390), x86-based Processors (Intel, AMD)	UNIX - Other, Windows NT, Z/OS (IBM Mainframe OS-390)	

## Major Business Application Identification Report

System ID	Short Name	Long Name	System Description	Inventory Source	System Location	System Platform	System OS	Version
4007	Unicenter Asset Management	Unicenter Asset Management	Systems asset inventory.	2005 ESI Survey		x86-based Processors (Intel, AMD)	Windows 2003	
4008	Unicenter Knowledge Tools	Unicenter Service Plus Knowledge Tools	Web based repository and search engine for help/technical documents	2005 ESI Survey		x86-based Processors (Intel, AMD)	Windows 2003	
4009	Unicenter NSM	Unicenter Network and Systems Management	SNMP/RMON and proprietary system agent element manager	2005 ESI Survey		x86-based Processors (Intel, AMD)	Windows 2003	
4011	Unicenter Service Desk	Unicenter Service Plus Service Desk	Help desk trouble ticket manager	2005 ESI Survey		x86-based Processors (Intel, AMD)	Windows 2003	6.1
4012	Unicenter Service Plus Dashboard	Unicenter Service Plus Dashboard	Help Desk ticket management system live reporting tool	2005 ESI Survey		x86-based Processors (Intel, AMD)	Windows 2003	
4017	UPN	Universal Product Number (UPN)	The Universal Product Number (UPN) is used to uniquely identify products used in the supply chain. The UPN is placed as bar code symbols on products to enable users of the products to readily identify the product's characteristics. This is accomplished by cross-referencing the UPN identifier derived from the bar code symbols to a database of product information. The focus of VA's effort are on capturing the UPN information for Medical and Surgical products utilized by the VA medical facilities. Efforts are underway to establish a UPN repository of the Medical and Surgical products frequently used by the VA medical facilities.	2005 ESI Survey		MAINFRAME	Windows NT	
4025	USP	Unicenter Service Plus Service Desk	Provides service desk support to AAC and selected customers. Allows for tracking of service tickets and change orders using automated workflows.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	x86-based Processors (Intel, AMD)	Windows NT	
4026	UTUP	Union Official Time Use Program	This site has been established by the Office of Labor Management Relations (LMR) in compliance with the Office of Personnel Management requests for accountability of "Official Time for Union-Related Activities".	2005 ESI Survey	OTHER Unspecified	x86-based Processors (Intel, AMD)	Windows 2003	
4029	VA HRC CCPC	VA HRC Consolidated Co-payment Processing Center	The Consolidated Co-payment Processing Center (CCPC) is a data file maintained at the Austin Automation Center and was created to enable the printing and mailing of patient billing statements. The database contains the contact and billing information of veteran patients, which is extracted from each VistA system in the VHA. The VA HRC CCPC system imports extracts from the central CCPC and using a web interface allows customer service representatives to see the bill just as the veteran or family member sees it.	2005 ESI Survey		x86-based Processors (Intel, AMD)	Windows 2003	

## Major Business Application Identification Report

System ID	Short Name	Long Name	System Description	Inventory Source	System Location	System Platform	System OS	Version
4030	VA HRC IW	VA HRC Information Warehouse	The VA HRC IW web site preserves the information from the information warehouse which was part of the HR LINK\$ Employee Self Service (ESS) application. The Employee Self Service application was hosted on servers at the Austin Automation Center. When services provided by Employee Self Service were contracted to OPM's Employee Express the ESS database was migrated from DB2 to Microsoft SQL and relocated to the HRC. A web enabled front end was created using Microsoft IIS to enable HRC HR specialists to have access to this static data archive in order to meet the needs of their customers.	2005 ESI Survey		x86-based Processors (Intel, AMD)	Windows 2003	
4032	VA LMS	VA Learning Management System	A COTS Learning Management System (Plateau) that will provide, a full function ability to manage all learning in VA at all levels of the organization. Will provide the capability for learners to manage their own training, responsible offices to automatically assign training to target audiences, track all training in VA, and act as a portal to all online training.	2005 ESI Survey	OPM sponsored location	Sun RISC System	Solaris	
4033	VA PD LIBRARY	VA Position Description Library	The Department of Veterans Affairs has a web site called the PD Library (Position Description Library). The VA HRC agreed to maintain this web site on behalf of the Department. The site has over five hundred position descriptions (PD's) in it and will have the capability for additional PD's to be added. HR management will control what PD's can be added and will have the capability to inactivate them if they become outdated.	2005 ESI Survey		x86-based Processors (Intel, AMD)	Windows 2003	
2512	VA/DoD Sharing	VA/DoD Sharing	The VA/DoD Sharing Database was originally developed to provide the VHA and the Department of Defense (DoD) software for recording, tracking, and compiling reports from the information generated by joint VHA and DoD activities. Activities included the creation of formal agreements between VHA and DoD sites that were sharing resources in some manner. The database was migrated from FORUM to a web-based product available on the VHA Intranet.	2005 ESI Survey		x86-based Processors (Intel, AMD)	Windows NT	
4038	VACO Phonebook	VACO Phonebook	The application provides an online alphabetical and classified listing primarily for VACO. It also is capable of generating files that can be used to publish a hard copy of the VACO telephone directory.	2005 ESI Survey	OTHER Unspecified	x86-based Processors (Intel, AMD)	Windows 2003	
1232	VACOLS	Veterans Appeals Control and Locator System:	Access to VACOLS allows RO personnel to view, locate, update and track the status of appeals cases submitted to the Board of Veterans Appeals. VACOLS contains pre-programmed queries and generates reports.	2005 ESI Survey, FISMA, EA 2.1		E10K SUN	Solaris 9.0	
4039	VACOLS	Veterans Appeals Control and Locator System	Appeals creation, development and tracking system.	2005 ESI Survey	VACO	Hewlett Packard Alpha	HP-UX, Windows 2000, Windows NT, Windows Other	5.1A
4040	VAD	Veterans Assistance Discharge System	VAD is designed primarily to disseminate information to all recently discharged veterans on VA benefits and entitlements.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	IBM Mainframe (S/370, S/390)	Z/OS (IBM Mainframe OS-390)	

## Major Business Application Identification Report

System ID	Short Name	Long Name	System Description	Inventory Source	System Location	System Platform	System OS	Version
1237	VADS	Veterans Assistance Discharge System	VADS is an essential application because it is VA's method of informing the former GI of his or her rights, and indicates how to get information concerning them. VADS transfers service member DD214 information into BIRLS. The maintenance of VADS is tied to BIRLS since they both are involved in processing Veteran claims.	2005 ESI Survey, FISMA, 2006 OMB 300		IBM 2064-2c5	ZOS version 1.5	
4043	VALOR	VA Longitudinal Online Research Database	The VALOR Database fulfills three important objectives essential to the research mission of the Center for Health Equity Research and Promotion, a VA HSR&D Center of Excellence. (1) To maintain a distinct research database with information drawn from the Philadelphia VAMC VISTA system, the VA's electronic medical record. (2) To implement technical and administrative protocols for data access that balances the information needs of the VA research community with ethical guidelines and federal regulations regarding patient privacy. (3) To facilitate access to individual and population-based data essential to conducting VA-based clinical and health services research projects. Elements chosen for inclusion in the VALOR database reflect common themes to health services and clinical research.	2005 ESI Survey		x86-based Processors (Intel, AMD)	Windows NT	
4036	VA-ONCE	VA Online Certification of Enrollment	A web based application used by training facility Certifying Officials to submit electronic enrollment certification forms to VA	2005 ESI Survey		Compaq Proliant DL580R2	Windows 2000	
4046	VAST	VA Site Tracking (VAST)	The purpose of the VA Site Tracking database is to provides a single source for official counts of VHA service sites. The official counts as published in the Quarterly Executive Summary are needed for correspondence to Congress, news organizations, budget submissions and stakeholders.	2005 ESI Survey		x86-based Processors (Intel, AMD)	Windows NT	
4047	VAV	VA Voluntary Service (VAV) - Now Inactive	The VA Voluntary Service (VAV) System provided reports on volunteer participation to all organizations involved in active volunteering at each VA Facility, including the organizations on the VA Voluntary Service Advisory Committee. It also provided a number of statistical reports to medical facilities on how volunteer assistance was used and created potential award recipient lists.	2005 ESI Survey		MAINFRAME	z900	
4048	VBA Operations Center	VBA Operations Center	TBD	2005 ESI Survey		Compaq Proliant DL580R2	Windows 2000	
4049	VCA	Veterans Canteen Applications	Provides support to Veterans Canteen Service (VCS) St. Louis desktops and servers. This is an umbrella effort for several VCA initiatives.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	Sun RISC System	UNIX - Other	
4051	VCS AIS	Veterans Canteen Service Automated Information System	This systems handles the processing and desktop support for the Veterans Canteen Service (VCS) Central Office and canteens in the field	2005 ESI Survey	Austin, TX - AAC Data Processing Center	IBM Mainframe (S/370, S/390), x86-based Processors (Intel, AMD)	Solaris, Z/OS (IBM Mainframe OS-390), Windows 2000, Windows 2003	1.0

## Major Business Application Identification Report

System ID	Short Name	Long Name	System Description	Inventory Source	System Location	System Platform	System OS	Version
4052	VD2	VBA Data Warehouse	VBA Data Warehouse (DW) and Operational Data Store (ODS) applications reside together on the Sun E10K in Austin. The AAC provides operational support services to VBA for these two applications. They have a Sun E10K at Hines for disaster recovery.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	Sun RISC System	UNIX - Other	
4053	VDW	Veterans Information System	Client server support for data warehouse located on AAC computer room floor.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	Sun RISC System	UNIX - Other	
4055	VERA	Veterans Equitable Resource Allocation	The Allocation Resource Center (ARC) in Braintree, MA operates the Veterans Equitable Resource Allocation (VERA) database, formerly called Resource Planning & Management (RPM). The ARC is part of the Resource Allocation & Execution Office of the Office of Finance.	2005 ESI Survey		Hewlett Packard RISC System	UNIX - Other	
1239	VERIS	Veterans Exam Request Information System	The VERIS Scientific package is a multifocal visual evoked potential system that includes software for mfERG and mfVEP recording.	2005 ESI Survey, FISMA, IT Procurement Tracking System, EA 2.1		x86-based Processors (Intel, AMD)	Windows 2000	
4064	VET POP	Veteran Population	System uses current veteran data to do various data projections	2005 ESI Survey	OTHER Unspecified	x86-based Processors (Intel, AMD)	Windows 2003	
4069	VETSNET - Architecture	VETSNET - Architecture	TBD	2005 ESI Survey				
4070	VETSNET - AWARDS	VETSNET - AWARDS	TBD	2005 ESI Survey				
4071	VETSNET - FAS	VETSNET - Finance and Accounting System	VN C&P Awards/FAS provides VBA the processing capability to generate and authorize compensation and pension awards	2005 ESI Survey				
4073	VETSNET - RBA2000	VETSNET - RBA2000	RBA2000 is the replacement system for the Rating Board Automation (RBA) application in use nationwide to support the preparation of disability rating decisions. RBA2000, unlike its predecessor, is integrated with VETSNET specifications for award processing and data storage formats and will provide improved support for the creation of text documents needed to document rating decisions. Current capabilities include direct transfer of award data from RBA2000 to the BDN. RBA2000 will continue the collection of claims data to support both information and budgetary requirements.	2005 ESI Survey		E10K SUN	Solaris 9.0	

## Major Business Application Identification Report

System ID	Short Name	Long Name	System Description	Inventory Source	System Location	System Platform	System OS	Version
4072	VETSNET - SPP	VETSNET - Search and Participant Profile	Search and Participant Profile provides the ability to locate Veteran, Claim, and/or Family Member records. The user may locate a record by performing a search by a File Number, Social Security Number, or Taxpayer ID Number. This search functionality includes a real-time interface between VETSNET and BIRLS. The Search function identifies all participants related to the search criteria. The search results offer a simple interface to detailed profile information about the participants found. Participants include veterans, family members, fiduciaries, and other associated groups and organizations. Participant information can be added or updated by accessing the appropriate profile. This application integrates with SHARE, CSS, and VN CP Awards.	2005 ESI Survey				
4068	VETSNET-MAPD	Modern Award Processing - Development	MAP-D is providing single Processing Development capability, which addresses complete claims development, claims status, and case management using the best features of existing applications.	2005 ESI Survey		E10K SUN	Solaris 9.0	
1214	VETSNET-SHARE	VETSNET SHARE System	SHARE is a computer application built with Windows-based color screens that a Regional Office employee can use to establish claim data. SHARE automatically creates claim data in the Benefits Delivery Network (BDN) and the corporate database to support the case management of many types of C&P claims.	2005 ESI Survey, FISMA, EA 2.1		E10K - SUN	Solaris 9.0	
4074	VETSNET-SOC	VETSNET - Statement of the Case/Supplemental SOC	SOC/SSOC is an application for creating SOC and SSOC Word documents. By reading an existing rating document created from RBA2000 or RBA, the application presents the user with a list of Issues to be included in the new SOC / SSOC. Adjudicative Actions can be entered for inclusion, as well as pertinent laws selected from the RBA2000 or RBA laws list. The user may choose from a selection of cover letters to be generated. Narrative text is copied from the rating document for the Issues selected. The user is allowed to edit the newly created SOC / SSOC using Word.	2005 ESI Survey		E10K SUN	Solaris 9.0	
4075	VHA IT Tracking System	VHA IT Tracking System	The IT Procurement Tracking process is designed to manage VA IT expenditures to ensure compliance to IT Security, compliance to Enterprise Architecture (EA) standards, and efficient management of IT resources. The process will emphasize the VA priority to achieve the greatest value in IT investments by leveraging standardization and economies of scale.	2005 ESI Survey	19D	Windows 2000	x-86-based Processors (Intel)	
4076	VHA LIB	VHA Library Package - Serials Module	VHA facilities have medical libraries that subscribe to journals. Through this VistA library package the library staff check in, route and claim issues not received from the publisher	2005 ESI Survey		Hewlett Packard Alpha	VMS	
1240	VICTARS	Veterans Insurance Claims Tracking and Response System	VICTARS is Insurance's Customer Relationship Management system, providing a gateway for insurance personnel to access data in client/server tables and on other systems.	2005 ESI Survey, FISMA, 2006 OMB 300	Bay Pines, FL - VHA IT Field Office	Compaq Proliant D1380	Windows 2000	

## Major Business Application Identification Report

System ID	Short Name	Long Name	System Description	Inventory Source	System Location	System Platform	System OS	Version
4161	VIP	Veterans Information Portal	The Veterans Information Portal (VIP) provides a gateway through which Veterans Benefits Administration (VBA) employees, lenders, appraisers/inspectors, and property managers can access certain VBA applications. The portal is positioned to serve relevant and customized content to internal employees, veterans, and public visitors via the Internet. The portal contains both private and public content. Public content is available to all users of the portal, including anonymous users. Users trying to access private content in the portal will be prompted to log in. The login information is validated against a group of user stores. Internal users will be validated against an NT Domain user store, while external users are validated against a user store located in the Common Database. These requests are delivered over the Internet through a Secure Socket Layer (SSL) connection.	2005 ESI Survey		Compaq Proliant DL580R2	Windows 2000	
1244	Virtual VA	Virtual VA	Virtual VA is an online electronic work environment (EWE) designed for processing veteran Compensation and Pension (C&P) claims.	2005 ESI Survey, FISMA, IT Procurement Tracking System, EA 2.1		E10K SUN	Solaris 9.0	
1245	VIS	The Veterans Information Solution	VIS2 is a web-based application that provides a consolidated view of comprehensive eligibility and benefits utilization data from across VBA and DOD.	2005 ESI Survey, FISMA	OTHER Unspecified	x86-based Processors (Intel, AMD), Sun RISC System	Solaris, Windows 2003	
1235	VIS	Vendor Inquiry System	VIS enables VA's vendors to make online inquiries to determine status of their payments and to request information on previous payments made.	2005 ESI Survey, FISMA, EA 2.1	Austin, TX - AAC Data Processing Center	Dell PowerEdge Server	IIS on Windows 2000, SQL on Windows	
4165	VISN 16 Data Warehouse	VISN 16 Data Warehouse	These warehouses contain information extracted from the 10 medical centers VistA systems in VISN 16	2005 ESI Survey	OTHER Unspecified	x86-based Processors (Intel, AMD)	Windows 2003	
4166	VISN 16 Hazard Rounds Database	VISN 16 Hazard Rounds System	Database and interface developed within VISN 16 to address requirement by VA to maintain hazard rounds data	2005 ESI Survey	OTHER Unspecified	x86-based Processors (Intel, AMD)	Windows 2003	
4171	VISTA	Veterans Information System Technology Architecture	TBD	2005 ESI Survey		Hewlett Packard RISC System	OTHER Unspecified	4.1.16

## Major Business Application Identification Report

System ID	Short Name	Long Name	System Description	Inventory Source	System Location	System Platform	System OS	Version
4174	VistA	Veterans Information Systems Technology Architecture	VHA Health Information Systems deployed at all 10 VISN 16 Medical centers	2005 ESI Survey	OTHER Unspecified	Hewlett Packard RISC System	OTHER Unspecified	
4172	VISTA	VISTA	HOSPITAL INFORMATION SYSTEM	2005 ESI Survey	OTHER Unspecified	Hewlett Packard RISC System	OTHER Unspecified	
4188	VistA Imaging	VistA Imaging	Medical image storage/distribution.	2005 ESI Survey	Silver Springs, MD VHA IT Field Office	x86-based Processors (Intel, AMD)	Windows 2003	
4220	VLC	Virtual Learning Center (VLC)	The Virtual Learning Center (VLC) was developed by the VHA Office of Special Projects as a systematic mechanism for VA employees to share innovations and successful/best practices to allow others to have easy access to this information saving time and resources when seeking ways to address similar needs.	2005 ESI Survey		x86-based Processors (Intel, AMD)	Windows NT	
4224	Voice Record Manager	Voice Record Manager	Transcription of physician verbal notes	2005 ESI Survey		x86-based Processors (Intel, AMD)	Windows 2003	
1242	VONAPP	Veterans On-Line Applications	One of the Education Service Applications. A VBA web-based application that allows veterans to electronically submit an application for benefits via the internet.	2005 ESI Survey, FISMA, 2006 OMB 300	HINES ITC	x86-based Processors (Intel, AMD)	Windows 2000	
1247	VR&E ROQ	Vocational Rehabilitation and Employment Review of Quality	The ROQ intranet site captures and collects data to reflect quality of delivery of services to Chapter 31 veterans.	2005 ESI Survey, FISMA, EA 2.1	PHILLY ITC	HP Compaq Proliant DL580R2	Windows 2000	
2505	VSSC/KLF NSSD	VSSC/KLF National SSN Security Database	The NSSD is a web-based application that is used to maintain access levels to patient SSN level information for employees with approved access. For each VA employee that has approved access to patient SSN information, the employees ISO or ACRS Point of contact adds an entry indicating access rights to specific types of data and the user's Active Directory Username into the NSSD. Other Windows server based reporting systems query this database when determining if a user can obtain detailed SSN level. ACRS POC's add/edit/delete users along with their access level to Real SSN data housed in VSSC reporting systems include the FCDM. VSSC SAS reports and FCDM drill to detail reports check this system prior to sending real SSN data via SSL.	2005 ESI Survey		x86-based Processors (Intel, AMD)	Windows 2003	
2514	VSSC/KLF UU DB	VSSC/KLF Utility Usage	The utility usage database gathers required information necessary for the annual energy report that VA submits to DOE as required by the National Energy Conservation Policy Act, Energy Policy Act of 1992 and Executive order 13123.	2005 ESI Survey		x86-based Processors (Intel, AMD)	Windows 2003	

## Major Business Application Identification Report

System ID	Short Name	Long Name	System Description	Inventory Source	System Location	System Platform	System OS	Version
4229	VWM	VHA Work Measurement	The VHA Work Measurement (VWM) database is an interim solution for collection of workload data which would not be available on a national level after completion of the Automated Management Information System (AMIS) Elimination project.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	IBM Mainframe (S/370, S/390)	Z/OS (IBM Mainframe OS-390)	
1013	WAFPS	Web Automated Folder Processing System	WEB Application that automates various file maintenance projects (XCR, CH30, DEA, CER retirement projects, and folder relocation (REL)) for inactive folders located at the ROs. This application replaces AFPS.	2005 ESI Survey, FISMA, EA 2.1	Austin VBA	Compaq Proliant DL580R2	Windows 2000	
4231	WARMS	Web Automated Reference Materials System	A web based application created for use by the public and VBA personnel when not on station. The content mirrors the ARMS application.	2005 ESI Survey	VACO 1800 G Street	Compaq Proliant DL580R2	Windows 2000	
1251	WAVE	Web Automated Verification of Enrollment	One of the Education Service Applications. A web-based application that allows students to electronically verify their school enrollments each month.	2005 ESI Survey, FISMA, 2006 OMB 300		x86-based Processors (Intel, AMD)	Windows 2000	
4235	WCP	Workers Compensation Information System for Department of Veterans Affairs (DVA)	Workers Compensation Information System for DVA is a database of worker compensation injury and illness claim data filed with the Department of Labor (DOL).	2005 ESI Survey	Austin, TX - AAC Data Processing Center	IBM Mainframe (S/370, S/390), x86-based Processors (Intel, AMD)	Z/OS (IBM Mainframe OS-390), Windows NT	
4242	WebELI	Web Expanded Lender Information	TBD	2005 ESI Survey		HP Compaq Proliant DL580R2	Windows 2000	
4244	WEBLOGON	VBA Intranet Application Logon Screen	Administrative application used to approve users for WebLogon's intranet applications. Used to grant access levels and to reset locked accounts and passwords for WebLogon.	2005 ESI Survey		Compaq Proliant DL580R2	Windows 2000	
4260	WIPP Browser	Work in Progress (WIPP) Browser	Converts the data already in the WIPP SYSTEM TO AN Excel SPREADSHEET so that one can sort the data by whatever criteria. Hartung said that this is used by some folks if at all. The WIPP Browser application allowed regional office personnel to manipulate and export to excel WIPP (Pending Claim) data. In many instances use of the the IMS application has replaced WIPP Browser for this purpose. - Barry Boskovich	2005 ESI Survey		Compaq Proliant DL580R2	Windows 2000	
1253	XCMI	XCMI	A web-based application that keeps track of who has done training	2005 ESI Survey, FISMA, EA 2.1		x86-based Processors (Intel, AMD)	Windows 2000	
4269	XRY	X-Ray Registration System	This system maintains the x-ray registry. The index provides the physical location of x-rays for separated veterans. The x-rays are kept at NARA's Civilian Personnel Record Center.	2005 ESI Survey	Austin, TX - AAC Data Processing Center	IBM Mainframe (S/370, S/390)	Z/OS (IBM Mainframe OS-390)
